(i) Calculation of Tax

Income taxes of certain consolidated subsidiaries of the Parent Company are calculated by applying a reasonably estimated effective tax rate for the full fiscal year to income before income taxes for the nine months ended December 31, 2020. The effective tax rate is determined by estimating the effective tax rate for the full fiscal year, which includes the nine months ended December 31, 2020, after taking into account the effect of deferred tax accounting.

(Changes in Accounting Policies)

Effective the nine months ended December 31, 2020, certain consolidated overseas subsidiaries adopted Accounting Standards Update ("ASU") No. 2016-13 - Financial Instruments - Measurement of Credit Losses on Financial Instruments issued by the Financial Accounting Standards Board.

The update is mainly applied to financial instruments valued at amortized cost and introduce a new current expected credit loss model. This model requires that an entity recognize as an allowance its estimate of contractual cash flows not expected to be collected on day one of the asset's acquisition.

In accordance with the amendments in this update applied on a modified retrospective basis, a cumulative effect adjustment to retained earnings was recorded at the beginning of the nine months ended December 31, 2020.

As a result, reserve for possible loan losses increased by ¥9,953 million and retained earnings decreased by ¥15,150 million at the beginning of the nine months ended December 31, 2020. In addition, both ordinary profit and income before income taxes for the nine months ended December 31, 2020 decreased by ¥11,749 million.
