Overview of the Group's Financial Results - Financial Results Highlights

- Solid sales results for the first half. In Japan, Dai-ichi Life continued to shift to a protection-type product portfolio while Dai-ichi Frontier Life launched new products that helped maintain favorable sales of foreign-currency denominated products. Overall performance of our overseas life insurance group companies was on track.
- Group profit and revenues were up. Net income and Group adjusted profit continued to perform above expectations. Dai-ichi Life's results significantly exceeded our original forecast as income from interest and dividends increased reflecting improvements in the financial and economic environment in foreign and domestic markets and the impact of the weaker yen as well as one-time gains on investments. Dai-ichi Frontier Life performed better than expected and our overseas life insurance business was on track. In light of recent improvements in the financial and economic environment, we made an upward revision to our original annual forecast for net income and Group adjusted profit.
- Group embedded value (based on preliminary calculations) increased from the end of March 2017 to 6.1 trillion yen at the end of September 2017 due to acquisition of new policies and improvements in the financial environment. Value of new business increased two-fold compared to the same period in the previous year in light of Dai-ichi Life's shift to protection-type products and new group insurance contracts at TAL.

Overview of the Group's Financial Results -**Consolidated Financial Results Highlights**

- Ordinary revenues were up due to an increase in investment income.
- Net income was higher than our expectations due to better than expected results of Daiichi Life and Dai-ichi Frontier Life along with the share exchange gain realized in connection with the Janus Henderson merger. Group adjusted profit was 102.1 billion yen.

Dai-ichi Life Group Results – Principal Consolidated Results

- Despite the decline in profit at Dai-ichi Life due to the absence of hedge-related investment gains it recorded last year, results were better than expected because of an increase in income from interest and dividends resulting from the weaker yen and one-time gains attributable to rising stock prices. Dai-ichi Frontier Life achieved profitability due to an increase in operating profit and improvements in GMMB balance. Profit was down for overseas life insurance business due to the absence of one-time positive factors experienced last year.
- Profit was up significantly due to the share exchange gain in relation to the Janus Henderson merger.

⁽¹⁾ In relation to the shift to a holding company structure, results of Dai-ichi Life for the six months ended September 2016 presented in this presentation are the results of former Dai-ichi Life.

Dai-ichi Life's Results - From Fundamental Profit to Net Income

- Positive spread improved due to positive impacts from the weaker yen and the rise in stock prices
- Ordinary profit declined because of the absence of derivative transaction gains recorded last year
- Started providing contingency reserves for insurance risk in light of growth in sales of protection-type products

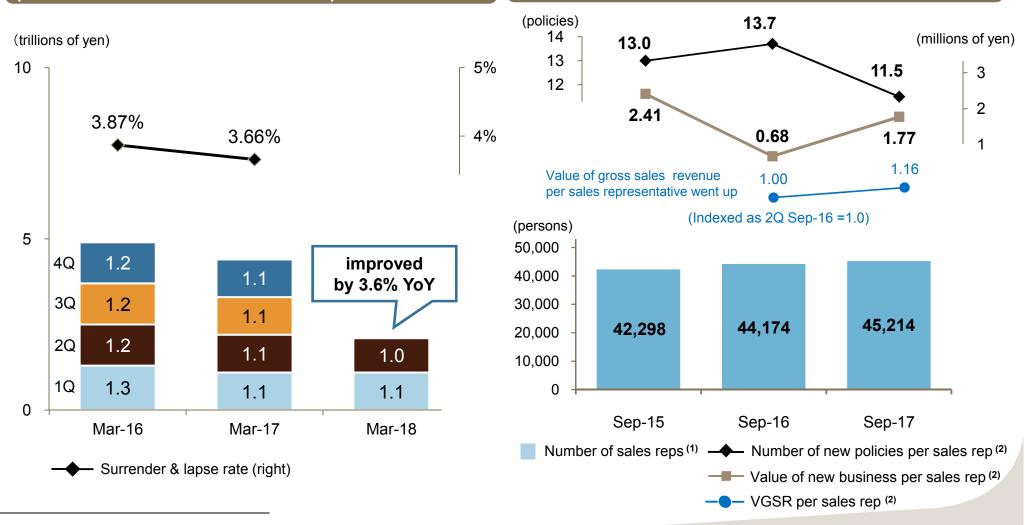

⁽¹⁾ Adjusted fundamental profit = (fundamental profit) ± (provision for (reversal of) policy reserve associated with minimum guarantee benefit risk of variable insurance). From the fiscal year ending March 2018, fundamental profit before adjustment does not include the effect of provision for (reversal of) policy reserve associated with market value adjustments of fixed life insurance and the effect of change in the exchange rates related to foreign currency denominated insurance contracts.

Surrender & Lapse (Individual Insurance & Annuities)

Number of Sales Reps and Productivity (1)(2)

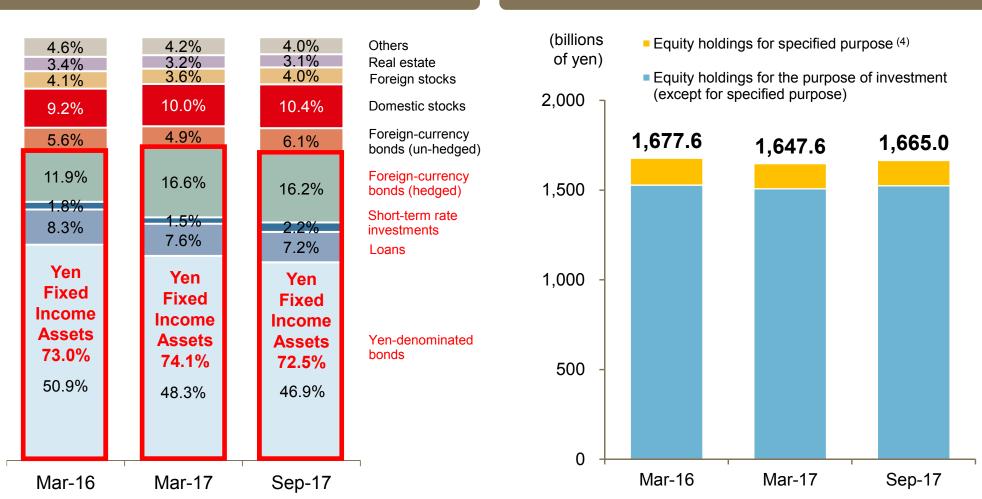

⁽¹⁾ The number of sales representatives does not include those who are not full-time employees of Dai-ichi Life and are engaged mainly in ancillary work.

⁽²⁾ Calculated by dividing the number of new policies, value of new business and VGSR (value of gross sales revenue) respectively, by the average number of sales representatives in each period. VGSR is an internal index of sales and is the value of new business before deduction of operating expenses etc. excluding the effect associated with environmental changes.

⁽¹⁾ Figures in 'Provision for policy reserves and others (negative indicates a reversal)' include figures of provision for reserves for outstanding claims and reversal of policy reserves which are showed in other ordinary revenues on the statement of earnings.

The following items include items that are offset by provision for (reversal of) policy reserves and unrealized gains (losses) on investments. There is impact of Gains (losses) but they do not have a significant impact on business results. (Gains or losses on investments in separate accounts, foreign exchange gains or losses, derivative transaction gains or losses)

⁽²⁾ Together with provision for policy reserves related to GMMB risk and related hedge gains (losses), risk charge included in premium for variable products, payments related to minimum guarantee and reinsurance account balance are accounted for in "Gains (losses) related to GMMB risk."

⁽³⁾ Provision or reversal of policy reserve related to market value adjustment excludes those parts that have no impact on the ordinary profit.

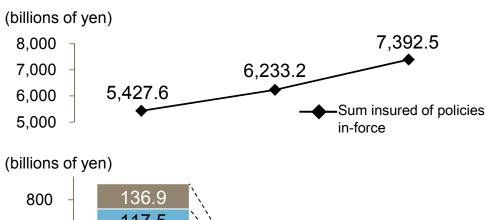

Dai-ichi Frontier Life's Results

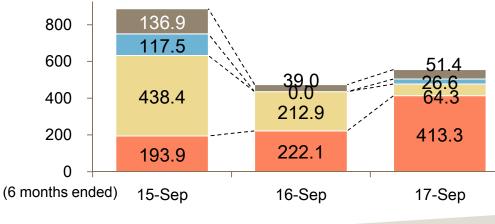

Results Highlights

- Successful introduction of new features to foreign currency fixed products and launch of new products contributed to an increase in sum insured of policies in-force and premium income.
- DFL achieved profitability because of an increase in operating income driven by accumulated sum insured of policies in-force and improvement in GMMB balance.

⁽²⁾ The fiscal year of Protective Life ends on December 31.

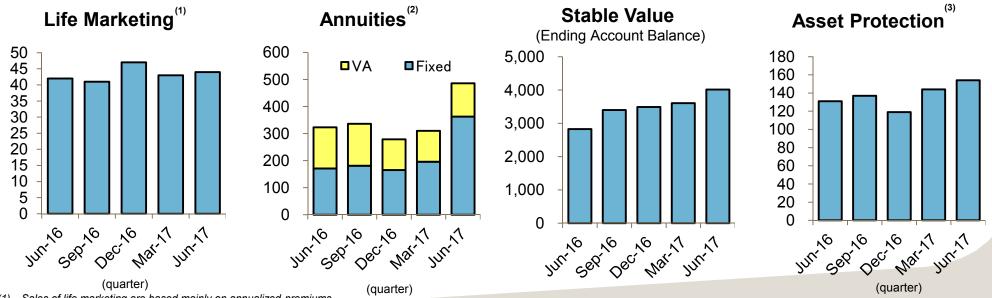

Protective Life's Results (1)

Overview

- Overall sales continued to be favorable with the exception of variable annuities, which continued to be impacted by expected regulatory changes. A pricing change in single-premium annuity contributed to strong growth in Annuities product sales.
- Pre-tax adjusted operating income increased slightly against the previous year due to higher account balance and improved investment income in the Stable Value segment, partly offset by a lower contribution from the Annuities segment. Net income declined due to lower realized gain related to modified co-insurance contracts.

Sales results (millions of USD)

⁽¹⁾ Sales of life marketing are based mainly on annualized premiums.

²⁾ Sales of annuities are based mainly on the amount of purchase payments received.

Sales of asset protection are based on the amount of single-premiums and fees received.

Overview

- In-force ANP grew because a number of new contracts were signed during Q1 in the Group segment
- Despite an increase in claims in the Individual and Group segments, improvement in operating expenses and price revision contributed to a 5% growth in underlying profit
- Net income declined by 29% YoY due to unfavorable investment income, etc.

^{(1) &}quot;Covered businesses" are the business areas that are to be covered by the EEV methodology set forth by the EEV principle. The EEV principle requires covered businesses to be disclosed. In the past, Dai-ichi Group categorized all of its businesses as covered businesses. However, following the shift to a holding company structure on October 1, 2016, subsidiaries engaged in the life insurance business (Dai-ichi Life, Dai-ichi Frontier Life, Neo First Life, Protective, TAL, Dai-ichi Vietnam and its subsidiaries) are categorized as covered businesses.

^{(2) &}quot;Adjustments relating to net worth of non-covered businesses" include net worth (1,227.6 billion yen) of non-consolidated Dai-ichi Life Holdings as of September 30, 2017, adjustments related to interest (minus 1,462.7 billion yen) in six subsidiaries of Dai-ichi Life Holdings that are engaged in the insurance business, and fair value adjustments to assets and liabilities of Dai-ichi Life Holdings

VIF + unrealized gains: Future profit from in-force business

Unrealized gains on other assets⁽²⁾

VIF *plus* unrealized gains on yen-denominated fixed income assets⁽³⁾

Net worth, etc. plus retained earnings in liabilities⁽⁴⁾ Accumulated realized gain

(1) EEV of Dai-ichi Life Group as of Mar-15 is restated using the ultimate forward rate.

(2) Dai-ichi Life's unrealized gains excluding those on yen-denominated fixed income assets (i.e. stocks, foreign bonds (excluding hedged bonds) and real estate etc.).

VIF of the Group plus unrealized gains on Dai-ichi Life's yen-denominated fixed assets as well as Dai-ichi Frontier Life's and Neo First Life's assets etc. (after some adjustments). This item is mainly affected by interests rates thus the amount changes in VIF and unrealized gains on yen-denominated fixed income assets etc. based on changes in interest rate levels offset each other.

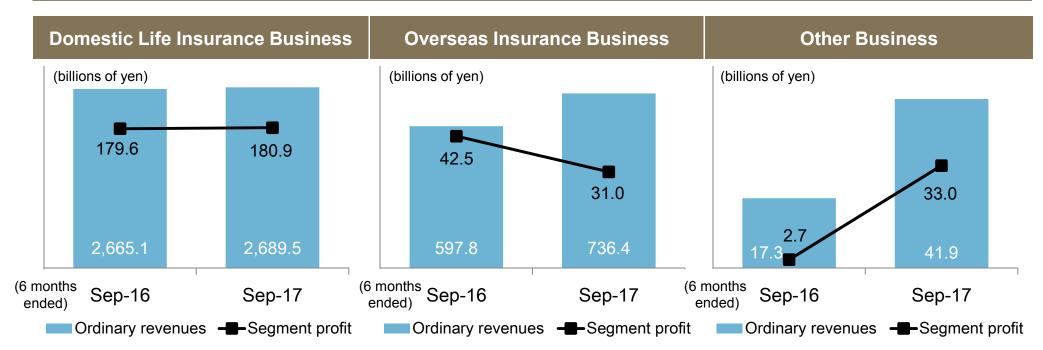

4) The sum of adjusted net worth of EEV for covered businesses and adjustments relating to net worth of non-covered businesses excluding unrealized gains.

Appendix

Overview of the Group's Financial Results – Segment Results

- Ordinary revenues: Premium and other income at Dai-ichi Life decreased as a result of controlled sales of savings-type products. Increased gains on investments in separate accounts drove ordinary revenues. However, this gain was offset by provision for policy reserves, leaving no impact on segment profit.
- Segment profit: While Dai-ichi Life recorded derivative transaction losses this half against gains last year, GMMB balance at DFL improved.
- Ordinary revenues: The increase in gains on investments in separate accounts at Protective was offset by provision of policy reserve, leaving no impact on segment profit.
- Segment profit: Positive impact of Protective's capital gains related to modified co-insurance contracts in the previous period was lower for this period.
- Both ordinary revenues and segment profit significantly increased mainly because Dai-ichi Life Holdings, Inc. received dividends from its subsidiaries.
