Key Highlights

1. [Results]

- ▶ New Business ANP
 - Domestic life new business recovered significantly compared to previous year when DL and DFL had sales constraints due to Covid-19. NFL continued expanding new business sales. Compared to pre-Covid-19 1Q FY2019, domestic sales reached similar level with DFL and NFL increasing while DL decreasing by 5%.
 - Overseas life new business increased steadily by 40% YoY(excl. exchange rates impact) thanks to contribution from PLC and DLVN.
- ▶ Group Adjusted Profit
 - Group adjusted profit increased to ¥113.3 billion (¥16.2 billion in 1Q FY2020), recovered from sharp deterioration impacted by increase in the financial markets volatility last year.
 - Although the progress is relatively high at 47% against our forecast mainly due to contribution from higher investment related gains at DL in the favorable financial market environment, there is no change in the full-year forecast considering budgeted reinsurance ceding at DL, recent rebound of Covid-19 infection and increase of financial markets volatility.

2. [Economic Value] (Estimate)

- ▶ Group EEV
 - Group EEV increased mainly due to contribution from DL in the favorable interest rates and equity market condition during 1Q.
- ▶ Domestic Life VNB
 - Domestic life value of new business was approx. ¥25 billion, approx. 20% progress rate vs full-year forecast.
- ▶ ESR
 - Integrated risk amount slightly decreased due to progress in market risk reduction and capital increased due to changes in financial markets.

3. [Topic]

- ▶ Investment Amount Capital Funding
 - TAL acquires Westpac Life for AU\$900 million(¥72.8 billion) with total investment amount of AU\$1.25 billion(¥101.0 billion), o/w AU\$925 million(¥74.8 billion) capital from holdings in addition to available funds at TAL. The deal to be completed by August 2022 - January 2023.
- ▶ Strategic Significance Financial Contribution
 - Contributing to improve group risk profile through taking insurance risk and further strengthening our business foundation in the Australian protection-type product market.
 - Expected profit contribution of approx. AU\$75 million(¥6.1 billion) and cash contribution of AU\$135 million(¥10.9 billion) in the next medium-term management plan (From FY2024)

COVID-19 related Insurance Claims

(1) Identified as of June 30, 2021. Exchange rates as of end of Jun. 2021 applied to foreign currencies, after accounting for reinsurance.
(2) Cumulative total since the start of measurement (March 2020).

		Death Benefit (Payment)		Hospitalization Benefit	
		Cases	Amount	Cases	Amount
Japan	Apr.-Jun. 2021	494	¥2.8 billion	9,875	¥1.0 billion
	Cumulative ⁽²⁾	1,270	¥7.4 billion	22,018	¥2.1 billion
Overseas ⁽¹⁾	Apr.-Jun. 2021	2,011	¥5.6 billion	2,237	¥0.2 billion
	Cumulative ⁽²⁾	9,128	¥37.8 billion	3,580	¥0.4 billion

2

- Here are today's three key highlights.
- Let me start with performance results for the 1Q. Domestic new business ANP increased significantly, reflecting a recovery from sales constraints amid the spread of Covid-19 in the previous fiscal year. Domestic life sales as a whole recovered to similar level observed during pre-Covid-19 period. Overseas life sales increased YoY mainly at PLC and DLVN.
- Group adjusted profit increased significantly YoY to ¥113.3 billion. The progress against the full-year forecast was 47%, mainly due to higher than expected gains on sales of securities at DL thanks to the favorable financial market environment.
- Although the progress rate is relatively high against forecast, there is no change in the full-year forecast considering expected cost of reinsurance ceding at DL after the 1Q, and recent rebound of Covid-19 infection as well as the increase in financial markets volatility.
- Next, economic value indicators. Both the group EEV and ESR rose, mainly due to an increase in the EEV of DL resulting from a rise in domestic super-long-term interest rates and an increase in unrealized gains on equity holdings.
- Domestic life value of new business was approximately ¥25 billion, which is approximately 20% of the full-year forecast.
- Final highlight is regarding the acquisition of Westpac Life through Australian TAL, as announced on 10th of August. Out of the total investment amount of AU\$1.25 billion, including acquisition price of AU\$900 million, AU\$925 million will be supported by the holding company through capital injection to TAL, and the acquisition is scheduled to be completed in August 2022 – January 2023.
- This is the first strategic acquisition to be made under the new capital strategy of the current medium-term management plan. This acquisition is expected to have a sufficient impact in terms of investment returns while also strengthening our business foundation in Australian market, and contribute to improving our risk profile by expanding insurance risk-taking.
- Please turn to the following page.

Highlights: Sales Performance

- Domestic life new business recovered compared to previous year when DL and DFL had sales constraints. NFL, which had been steady sales even during Covid-19, continued expanding new business sales and was up 47% YoY. Compared to pre-Covid-19 1Q FY2019, domestic life new business increased by 2.5%, with DFL and NFL increasing while DL decreasing by 5%.
- Overseas life new business increased by 40% YoY and 22% vs 1Q FY2019 (excl. exchange rates impact). PLC and DLVN had solid growth of 40% and 64% respectively YoY. Domestic life and overseas life as a whole increased 7.5% vs 1Q FY2019.

New Business and In-force Business ANP

	New Business ANP				In-force Business ANP		
	FY2020 1Q	FY2021 1Q	Change YoY	Change vs FY2019 1Q	As of Mar-21	As of Jun-21	Change

% change shown lower excludes impact from currency fluctuation

(1) From 3Q of FY2020 measurement of NFL sales at DL channel reflects refinement. (2) From 1Q of FY2020 new business ANP calculation standard was revised and data for prior periods was adjusted retroactively.

3

- Here I will explain sales performance.
- At DL, although sales of comprehensive medical insurance with lump-sum benefit, launched in January, were strong, new business ANP decreased slightly below the level of pre-Covid-19 FY2019 1Q.
- In June, we launched new product of hospitalization insurance with lump-sum benefit (simplified application type) that is easy for customers with sickness and other conditions to enroll in. Although results will be reflected from July onward, this product have been attracting interest, particularly among relatively young customers.
- In addition, although we are currently seeing increase in the spread of Covid-19, sales representatives continuing sales activities by prioritizing the safety and health of customers and actively utilizing non-face-to-face interaction, such as interviews on mobile app and web procedures.
- At DFL, amid a recovery in bancassurance channel, higher level of overseas interest rates YoY also contributed to the increase in sales.
- At NFL product revisions from April, including the expansion of coverage for 3 major critical illnesses product, has contributed to the increase in sales.
- Overseas life sales performance was generally solid even in previous year despite the spread of Covid-19 and it continued to grow in the current period. At PLC, sales of bank and company owned products insuring their employees expanded, and DLVN also maintained high YoY sales growth.
- Please go to the following page.

Highlights: Group Adjusted Profit and Net Income

- ▶ Group adjusted profit increased significantly to ¥113.3 billion, recovered from sharp deterioration of profits in the prior FY impacted by increase of financial markets volatility. For domestic life, improvement of derivative transaction gains for around ¥100 billion at DL contributed, and improvement in derivative and valuation losses and reversal of allowance for expected credit losses at PLC contributed to overseas life's profit.
- ▶ Net income was ¥138.4 billion after adding contribution of MVA-related gains (losses) at DFL to the group adjusted profit.

Drivers affecting Group Adjusted Profit

Adjusted Profit to Net Income

- Here, I will explain the details of profit indicators.
- Group adjusted profit improved significantly YoY to ¥113.3 billion. It was mainly due to an YoY improvement in losses from sudden fluctuations in the financial markets. At DL, there was an improvement from significant derivative transactions losses in previous year, while PLC recovered from non-operating valuation losses recorded in the previous year.
- On the other hand, at TAL significant interest rates change (flattening of the yield curve) impacted unfavorably the market valuation of expected future premium and claims cash flows in the distant future.
- DLVN, which expects high profit growth in this year, is steadily expanding its profits. Please refer to page 15 for newly added explanatory page for the details of non-consolidated financial results.
- Net income was ¥138.4 billion, reflecting these positive factors as well as the contribution of MVA related gains at DFL.
- Please go to the next page.

Highlights: Economic Value (Estimate)⁽¹⁾ – Group EEV, Domestic Life VNB and ESR

- ▶ Group EEV increased by 4% to approx. ¥7,260 billion from the end of FY2020, mainly due to contribution from DL in favorable interest rates and equity market condition during 1Q.
- ▶ Domestic life VNB was approx. ¥25 billion, approx. 20% progress rate vs full-year forecast, due to the relatively large number of conversion contracts at DL and at DFL overseas interest rates that are referred for VNB calculation declined at the end of quarter.
- ▶ ESR increased by 12% points to approx. 215%, reflecting an increase in capital due to an increase in unrealized gains, while the amount of integrated risk slightly decreased due to progress in market risk reduction.

- Here I will explain economic value indicators.
- Reflecting favorable financial market conditions, the group EEV increased by 4% from the end of FY2020 to approximately ¥7,260 billion. This increase is primarily attributable to DL contribution from a rise in the domestic interest rate yield curve in the super-long-term zone and an increase in unrealized gains on equities and other securities.
- Domestic life value of new business totaled to approximately ¥25 billion. The progress rate is about 20% compared to the full-year forecast.
- Although new business at DL showed a certain recovery on an ANP basis, the economic value basis progress was slightly slower versus the full-year forecast. This was mainly due to the fact that major part of new business comprised of revision of the existing policies.
- At DFL, estimated value of new business was ¥2 billion, reflecting decline in referred interest rate for calculating VNB, however actual assumed interest rates for products are set twice-a-month considering actual investment yields. At NFL solid sales expansion of medical insurance products contributed to the value of new business.
- ESR increased by 12% points to about 215%, reflecting increase in capital in the same manner as group EEV, while the amount of integrated risk decreased slightly due to ongoing efforts to reduce market-related risks.
- Please refer to the following page.

Overview of Group Financial Results/Group Earnings Forecast

- Group adjusted profit recovered from sharp deterioration of profits due to increase of financial markets volatility in the previous year. Although the progress is relatively high at 47% against our forecast mainly due to contribution from higher investment related gains at DL in favorable financial market environment, there is no change in the full-year forecast.

(¥ in billions unless otherwise noted)	FY2020 1Q	FY2021 1Q	YoY Change (%)		Progress rate vs. Forecast	FY2020 Actual	FY2021 Forecast	YoY Change (%)

6

- The progress of performance against forecast for FY2021 is as shown on this slide.
- Although the progress rate for group adjusted profit is slightly high, as explained earlier there is no change to the full-year forecast at this point.
- Please turn to the next page.

Australian Subsidiary TAL Acquires Westpac Life Insurance Services Limited

- ▶ TAL has agreed to acquire 100% shares of Westpac Life Insurance Services Limited (Westpac Life), for AU\$900 million (Total Investment Amount including additional investment from DLHD is AU\$1,250 million). The acquisition is scheduled to be completed by August 2022 – January 2023.
- ▶ By improving profitability through the realization of cost synergies, this acquisition is expected to secure an IRR that exceeds the assumed capital cost of TAL.
- ▶ This acquisition will contribute to the growth of Group's earnings, improve the risk profile and further diversify earnings by increasing exposure to protection-type insurance market in Australia. Further diversifies TAL's distribution footprint in Australia with a strategic partnership with a major bank in Australia.

7

- Finally, I would like to talk about the acquisition of Westpac Life by TAL.
- Total investment amount of AU\$1.25 billion is comprised of acquisition price of AU\$900 million and additional investment of AU\$350 million. Approximately AU\$925 million of total investment will be a capital contribution from the holding company. The acquisition is scheduled to be completed in August 2022 - January 2023.
- Being in line with the group strategy of improving group risk profile, this acquisition will lead to the expansion of insurance risk taking by focusing on protection-type products. In addition, TAL already has a leading business presence in Australian protection-type products market, and strategic alliance with Westpac Group, one of the major banking groups, which has a wide customer base, would strengthen sales capabilities of TAL to capture bank customers where TAL has currently relatively smaller presence.
- Although the full-scale contributions to the group performance results is expected to be realized during the next medium-term management plan, considering time until realization of cost synergies, certain contribution is expected even during the current medium-term management plan period. Adjusted profit of AU\$75 million, cash contribution of AU\$135 million including expected release of required capital from Westpac Life's in-force contracts, is expected in the next mid-term management plan period (FY2024).
- From the current medium-term management plan, under a capital policy that is more conscious of the cost of capital, strategic investment and return on investment will be evaluated based on cost of capital that takes into account the beta according to each business risk characteristics and each country market risk premium. This acquisition is expected to secure more than 10% return that significantly exceeds the assumed cost of capital for TAL, which mainly focuses on protection type products in Australia. And also taking into consideration expected synergies and strategic significance and comparing with other capital allocation options, including share buyback, we judge it to be an attractive deal.
- That is all for my explanation.

Group Companies Performance Overview

[Group Companies Performance Overview]

Domestic Life Insurance Business: Dai-ichi Life

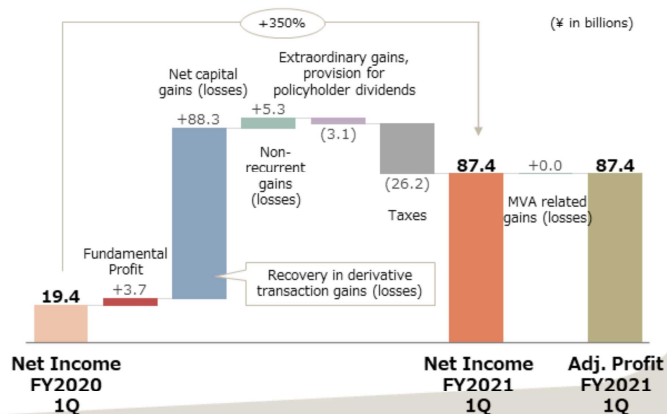

- ▶ Fundamental profit increased by 3% to ¥121.5 billion mainly due to increase in positive spread.
- ▶ Adjusted profit increased by 350% to ¥87.4 billion, due to improvement from significant derivative transactions losses in previous year.

(1) Represents insurance liabilities associated with individual insurance and annuities in the company's general account and duration of yen-based fixed income assets (including interest rate swaps) and the balance of policy-reserve-matching bonds (PRMB) and derivatives. PRMB is a unique category for bonds, accepted under Japanese GAAP. PRMB is reported at amortized cost if the bonds meet certain requirements.

(2) Within domestic equity (excluding stocks of subsidiaries, affiliates and not-listed domestic stocks) the book value of equity held for purposes other than pure investment as of end of Jun-21 was ¥74.6 billion.

[Group Companies Performance Overview]

Domestic Life Insurance Business: Dai-ichi Frontier Life

- Fundamental profit decreased by 28% to ¥10.5 billion due to losses related to GMMB risk, however net income increased by 4% to ¥37.9 billion due to decrease in provision for contingency reserve.
- Adjusted profit increased by 4% to ¥11.2 billion due to increase in sales of securities.

Net Income (loss) YoY change and Adjusted Profit

(1) Effective from the 1Q FY2021, performance results items have been revised by rearranging previous operating profit to disclosing items other capital gains (sale of securities, etc.), other non-recurrent gains (losses) on sale of securities and reinsurance income (loss) etc. (2) Interest received (paid) related to currency swap and interest rate swap contracts covering foreign-currency denominated insurance policies, along with impact from assets held in money trusts and others related to reinsurance dealings, are reclassified from capital gains(losses), effective from 1Q FY2020.

[Group Companies Performance Overview]

Domestic Life Insurance Business: Neo First Life

- Premium and other income increased by 3%, YoY in line with the expansion of new business.
- Net loss was ¥1.5 billion as a result of an increase in claims (mainly surrender value repayment) offset by policy reserves reversal.

Performance Results

Net Income (loss) YoY change

[Group Companies Performance Overview]

Overseas Life Business – Protective, USA

- Pre-tax adjusted operating income increased by 5% YoY to \$75 million primarily due to higher contribution from Stable Value Products and Acquisitions business partially offset by claims leading to deterioration in earnings in the Retail Life & Annuity business.
- Net income recovering from net loss incurred in previous year 1Q to \$107 million, due to partial reversal of allowance for CECL in the commercial mortgage loan portfolio and improvement in valuation losses in the fixed income portfolio associated with financial market fluctuations.
(Note: PLC's financial results for 2Q(April-June) of FY2021 are scheduled for release at around August 13 afternoon, local time.)

(1) Derived from net income by excluding realized gains and losses on investments and derivatives, etc. (2) The immediate impacts on DAC, VOBA, reserves and other non-cash items in current period results due to changes in current market conditions on estimates of profitability, which are excluded from pre-tax adjusted operating income (loss) beginning in Q1 of 2021. Data for prior periods was not adjusted.

[Group Companies Performance Overview]

Overseas Life Business – TAL, Australia

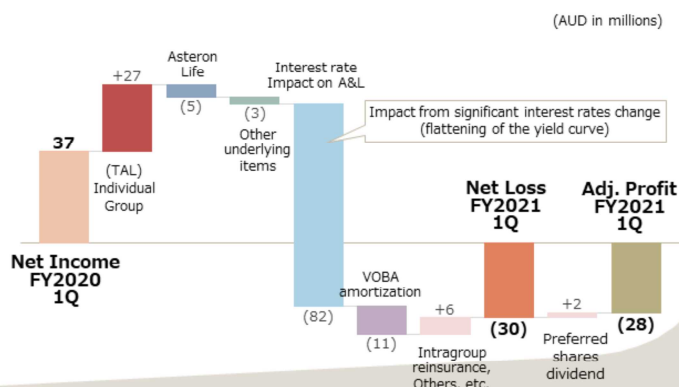

- Underlying profit increased by 72%, YoY to AU\$43 million mainly due to improvement at Individual and Group segments.
Net loss of AU\$30 million was due to significant interest rates change (flattening of the yield curve) impacting the market valuation of expected future premium and claims cash flows in the distant future.
- Following completion of Asteron Life's integration process, its assets and liabilities will be transferred to TAL from October 2021. (assuming the completion of related legal procedures)

PLC: US\$ in millions, TAL: AU\$ in millions

(1) "Covered businesses" are the business areas that are to be covered by the EEV methodology set forth by the EEV principle. Our subsidiaries engaged in the life insurance business (DL, DFL, NFL, PLC, TAL, DLVN and its subsidiaries) are categorized as covered businesses.

(2) "Adjustments related to non-covered businesses" include net worth (as of Mar-21: ¥1,367.4 billion, Jun-21: ca. ¥1,430.0 billion) of non-consolidated Dai-ichi Life Holdings, adjustments related to interest (as of Mar-21: minus ¥1,477.3 billion, Jun-21: minus ca. ¥1,410.0 billion) in six subsidiaries of Dai-ichi Life Holdings that are engaged in the insurance business, and fair value adjustments to assets and liabilities of Dai-ichi Life Holdings.

EEV of Dai-ichi Life Group after Reclassification

Reclassification of EEV from ALM point of view

(¥ in billions)	As of Mar-21	Jun-21 Est.	Change	(¥ in billions)	As of Mar-21	Jun-21 Est.	Change
Group EEV	6,971.1	ca. 7,260.0	ca. +290.0	Group EEV	6,971.1	ca. 7,260.0	ca. +290.0
Covered Businesses	6,997.1	ca. 7,150.0	ca. +160.0	Unrealized gains on other assets ⁽³⁾	2,257.5	ca. 2,300.0	ca. +50.0
Adjusted net worth	6,962.2	ca. 7,040.0	ca. +80.0	VIF <i>plus</i> unrealized gains on yen-denominated fixed income assets ⁽⁴⁾	2,517.8	ca. 2,730.0	ca. +210.0
Value of in-force business	34.9	ca. 110.0	ca. +80.0	Net worth, etc. <i>plus</i> retained earnings in liabilities ⁽⁵⁾	2,195.7	ca. 2,230.0	ca. +40.0
Adjustment related to non-covered businesses	(25.9)	ca. 110.0	ca. +130.0				

EEV of Dai-ichi Life Group after Reclassification

VIF + unrealized gains:
Future profit from in-force business

Unrealized gains on other assets⁽³⁾

VIF *plus* unrealized gains on yen-denominated fixed income assets⁽⁴⁾

Net worth, etc.
plus retained earnings in liabilities⁽⁵⁾
Accumulated realized gain

- (1) EEV of Dai-ichi Life Group as of Mar-15 is restated using the ultimate forward rate.
 (2) From EEV calculation as of March 31, 2021, standard changes of UFR(Ultimate Forward Rate) and LLP(Last Liquid Point) were applied, and reflected corporate bond spreads in the discount rate at DFL.
 (3) DL's unrealized gains excluding those on yen-denominated fixed income assets (i.e. stocks, foreign bonds (excluding hedged bonds) and real estate etc.).
 (4) VIF of the Group *plus* unrealized gains on DL's yen-denominated fixed assets as well as DFL's and NFL's assets etc. (after some adjustments).
 This item is mainly affected by interests rates thus the amount changes in VIF and unrealized gains on yen-denominated fixed income assets etc. based on changes in interest rate levels offset each other.
 (5) The sum of adjusted net worth of EEV for covered businesses and adjustments relating to net worth of non-covered businesses excluding unrealized gains.

Investment Amounts by Product Fund & Foreign Currency Bonds

*Figures in brackets are as of March 31, 2021.

Gains and Losses on Market Value Adjustment (MVA)

- For products with MVA option, the J-GAAP liabilities are recognized as the greater of surrender value or the value of policy reserves determined by assumed interest rate. When interest rate decreases, the surrender value will be higher than the value of policy reserves, resulting in an accrual of MVA related policy reserves.
- Gains/losses on MVA are offset on an accounting basis over time, therefore excluded from group adjusted profit calculation.

Policy Reserves Accrual on MVA

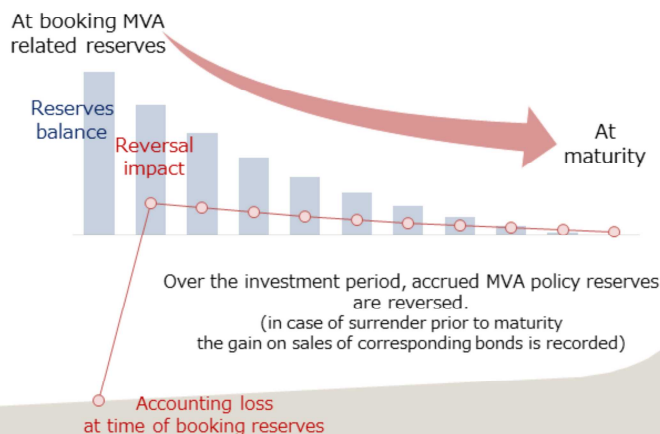

**Interest rate decrease
≡ Accrue MVA related reserves**

J-GAAP liabilities at the end of each period are based on the higher of ① or ②. When interest rate decline and ② > ①, additional policy reserves are accrued.

Reversal of Policy Reserves Accrued on MVA

Assuming flat interest rate after booking MVA related policy reserves, the amount of reserves is recalculated according to the market interest rate.

FY2021 Group Adjusted Profit and Value of New Business Forecast

- ▶ Group adjusted profit expected to decline to around ¥240bn, due to the absence one-time items recorded in FY2020 for both domestic and overseas life.
- ▶ DL adjusted profit is expected to be flat, as the improvement in derivative transactions losses will offset the decrease in interest and dividend income. For new strategic reinsurance approx. ¥300bn in policy reserves and ¥85bn in non-recurrent losses were factored in the forecast, the same scale as in the previous fiscal year.
- ▶ Group value of new business is expected to be ¥159bn, up ¥31.9bn YoY, due to the reactionary increase after restraint of sales activity at DL in FY2020 and an improvement in the interest rate environment.

Adjusted ROE Definition and Past Results

Adjusted ROE = [Numerator] Adjusted profit ÷ [Denominator] Adjusted net assets (Average of year beginning and ending value)

Adjusted net assets = Net assets - Goodwill - Unrealized gains/losses on fixed-income assets* + MVA balance at Dai-ichi Frontier Life(net of tax)

* Dai-ichi Life, Neo First Life: Amount classified as net unrealized gains on securities within fixed-income assets, net of tax⁽¹⁾
Dai-ichi Frontier Life, Protective Life: Net unrealized gains on securities, net of tax

Definition of Group Adjusted Profit

[Adjustment 1] Provision for contingency and price fluctuation reserves, etc. (In excess of statutory requirement, net of tax)

In addition, if there are similar provisions at overseas subsidiaries and affiliates, adjustments will be made case-by-case basis.

[Adjustment 2] MVA related gains (losses), net of tax, etc.

Adjusted for technical accounting valuation gains and losses

[Adjustment 3] Amortization of goodwill, gains/losses on acquisition phase, gains/losses on change in shareholding, etc.

Adjusted for gains/losses on organizational restructuring and amortization of goodwill, etc. in the consolidation procedures of each company.

(1) It mainly defines unrealized gains/losses on yen-denominated bonds, purchased monetary claims, hedged foreign currency-denominated bonds, and investment trusts whose main investment targets are fixed-income assets.

Shareholder Payout Policy

Shareholder Payout Policy

Consider flexible additional payouts (from FY2020)

- Rough guide for Total Payout Ratio considered: Mid-term avg. 50%

[Policy on cancellation of treasury stock]
The treasury stock is expected to be cancelled at an appropriate timing unless it is held for any specific reason.

[Image on transition of total payout ratio]

The scale and timing of additional payout is decided strategically

[Image on transition of dividend payout ratio]

Stable dividend based on profit (FY2021)

[Dividend payout ratio] **30%+ each FY**

- Average group adjusted profit for past 3 year
- Basically no reduction of dividend per share.

Considerations for additional payout

ESR Level
Status of market risk and sensitivity reduction
Cash position of the holding company
Group Financial Leverage
Existence of strategic investment opportunities
Our stock price, etc.

Shareholder Payout Dynamics
