Currency Exchange Rates (TTM)

As of end	¥/US\$	¥/Euro	¥/AU\$
<b>Dec. 2025</b>	<b>¥156.56</b>	<b>¥184.33</b>	<b>¥104.82</b>
Sep. 2025	¥148.88	¥174.47	¥97.89
Jun. 2025	¥144.81	¥169.66	¥94.50
Mar. 2025	¥149.52	¥162.08	¥93.97
Dec. 2024	¥158.18	¥164.92	¥98.50
Sep. 2024	¥142.73	¥159.43	¥98.73
Jun. 2024	¥161.07	¥172.33	¥107.00
Mar. 2024	¥151.41	¥163.24	¥98.61

# Record-high 3Q profit with strong progress; full-year forecast revised upward

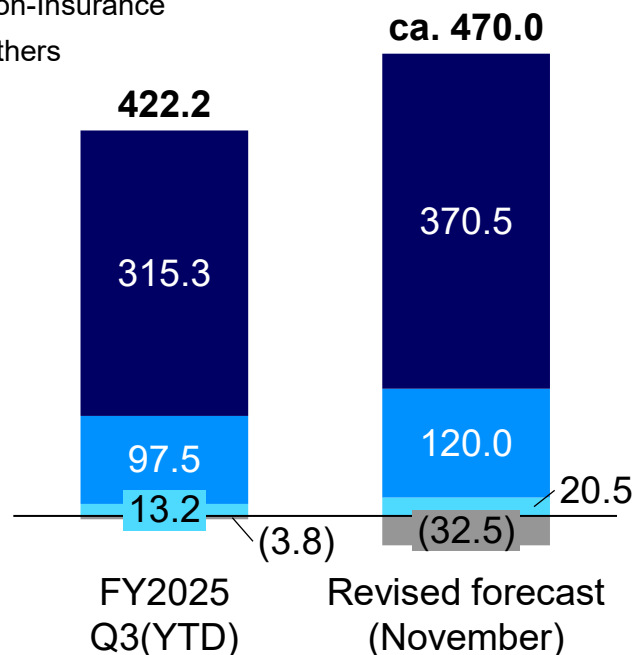

<b>Group Adjusted Profit</b> FY2025 Q3(YTD)	¥422.2 <sub>bn</sub>	Group adjusted profit totaled ¥422.2bn, achieving 90% of the Nov. revised forecast of ¥470.0bn, reflecting progress ahead of plan
<b>Group ESR</b> Dec. 2025 / Approximate	ca. 213%	213% (+3% vs. end of March 2025), as increased surrender risk due to higher domestic interest rates was offset by higher eligible capital driven by rising domestic equity prices
<b>New Full-Year Forecast for Group Adjusted Profit</b>	¥500.0 <sub>bn</sub>	Full-year Group adjusted profit forecast raised again to a record high, supported by strong earnings momentum at DL (Nov. forecast: ¥470.0bn)
<b>Dividend per Share</b> Forecast	¥52	In line with the upward revision of the full-year Group adjusted profit forecast, the dividend forecast has been increased (+¥1 vs Nov. forecast / Interim ¥24, Year-end ¥28)

# Solid performance across domestic and overseas businesses

## Group Adjusted Profit Compared to the Nov. revised Forecast

(¥ in billions)

■ Domestic  
■ Overseas  
■ Non-Insurance  
■ Others

Progress Rate  
(vs. Nov. Revised Forecast)

### Domestic Business<sup>(1)</sup>

- (DL) Positive spread driven by higher income from alternatives and investment trust
- (DFL) Slower progress at Q3; however, a release of contingency reserves is expected in Q4 following changes in reserving standards, keeping full-year performance in line with guidance

85%

### Overseas Business

- (PLC) Cost reductions and improved investment income
- (TAL) claim payments were offset by one-off gains, resulting in progress broadly in line with the budget.
- (DLVN) The consolidated financial statements recognize an impairment loss of a portion of the upfront fees<sup>(2)</sup> related to the bancassurance channel (ca. ¥8.0bn)

81%

### Non-Insurance Business

- (Asset Management Business) Overall earnings progressed steadily, while CP underperformed the budget due to lower performance-based fees
- (BO) Earnings progressed steadily

64%

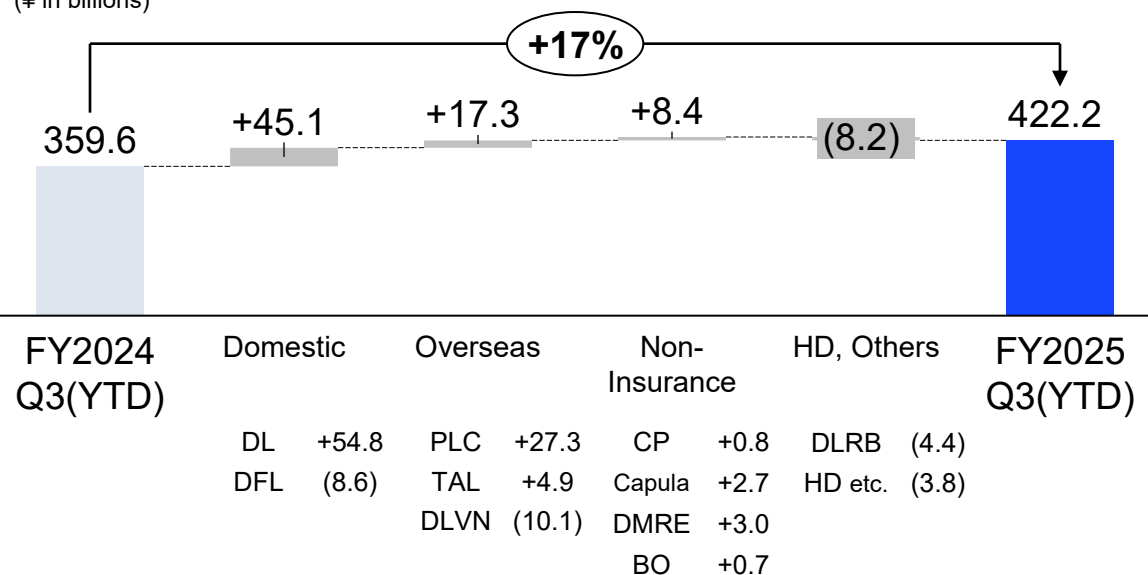

(1) For the comparison by business segment and against the full-year forecast, figures are adjusted to exclude the impact of intra-group reinsurance between DFL and NFL.

(2) The consolidated financial statements recognize an impairment loss of a portion of the upfront fees, which had been recognized as long-term prepaid expenses. In accordance with local accounting standards, no impairment was recorded at DLVN's standalone financial statements.

# Group Adj. Profit +17% YoY, setting a record high at Q3

## Group Adjusted Profit YoY Change

(¥ in billions)

FY2025 Q3(YTD)	315.3	97.5	13.2	(3.8)	422.2
FY2024 Q3(YTD)	270.2	80.3	4.8	4.4	359.6

### Domestic Business

- (DL) Positive spread increased, supported by the carryover effect of prior-year spread build-up and higher alternative-asset dividends, while gains on securities sales rose significantly
- (DFL) Earnings declined due to higher new business expenses, mainly driven by increased sales of non-ceded products

### Oversea Business

- (PLC) Earning increased aided by cost reductions and improved investment income, in addition to a one-off gain on the sale of a subsidiary agency
- (TAL) Despite higher claim payments, earnings increased due to one-off gains from reinsurance restructuring and the impact of yen depreciation
- (DLVN) Earnings decline due to impairment loss of the upfront fees related to bancassurance channel (ca. ¥8.0bn)

### Non-Insurance Business

- (Asset Management Business) Earnings increased following the commencement of profit contribution from DMRE
- (BO) Increased profit contribution following subsidiary consolidation

### HD/Others

- (DLRB) Impact of spread widening of corporate bond has dissipated; however, earnings declined due to the absence of prior-year one-off gains
- (HD) Higher expenses reflecting inflationary pressures and reinforcement of corporate functions

# Difference between Group Adjusted Profit and Net Income

- ▶ Underlying earnings remain solid despite market factors, with Group Adjusted Profit progressing steadily
- ▶ While accounting profit was temporarily affected by ModCo-related valuation impacts at PLC, our fundamental earnings capacity remains fully intact.

Key Factors behind Differences between Adjusted Profit and Net Income

(¥ in billions)

	FY2025 Q3(YTD)	Key Factors
MVA-related Gains/Losses	(8.9)	-
Amortization of Goodwill	(30.0)	[ - ] Amortization by executing M&A transactions
Adjustment for Valuation Gains/Losses	(22.8)	[ + ] (TAL) Increase in valuation gains due to the tightening of credit spreads. [ - ] (PLC) Losses related to Modco and other factors etc.
Change in Equity Interest	+8.7	[ + ] (DMRE) Gains on change in equity interest associated with the establishment of JV.
Others	+1.2	-

\*Details of the reconciliation are provided on [p49](#)

# Impacts of Rising Domestic Interest Rates

- ▶ Lapse rates have remained low at both DL and DFL even amid rising yen interest rates. DL dynamically rebalanced its policy-reserve-matching bond portfolio in line with fluctuating liabilities, thereby expanding the positive spread and lowering the dollar duration ratio (matching ratio) to below 100%.
- ▶ EV increased as yield curve steepened. ESR remained stable, with the higher mass lapse risk from rising interest rate offset by an increase in eligible capital.
- ▶ We expect a sustained improvement in our earning power from FY2026 onward by expanding the positive spread through agile rebalancing of yen-denominated bonds.

## Interest Rate Environment<sup>(1)</sup>

	10Y	30Y
Mar. 2025	ca. 1.5% (+20bps)	ca. 2.5% (+60bps)
Sep. 2025	ca. 1.7% (+40bps)	ca. 3.1% (+30bps)
Dec. 2025	ca. 2.1%	ca. 3.4%

## Investment (DL)

[p25](#)

## Economic Value

### EV

[p34](#)

### ESR

[p14](#)

## Impact of Rising Interest Rates

- Bond rebalancing significantly improved yields of the yen fixed-income portfolio.

- Reflecting the fluctuation in liability value amid rising interest rates, we conducted agile rebalancing of policy-reserve matching bonds.
- The matching ratio declined from the end-September level due to bond rebalancing.

- Lapse rates for DL's single-premium products have risen only modestly despite higher yen interest rates.
- Overall lapse rates for DL, including protection products, have remained broadly flat.

- Group EV increased by ca.¥1.5tn from FY2024, driven by the steepening of the domestic yield curve and higher domestic equity prices.

- Mass lapse risk has continued to increase amid rising domestic interest rates (up by ca. ¥500bn from the FY2024 year-end), but this was offset by an increase in eligible capital, keeping ESR stable.

## Impact of FY2025 Operations

ca. +¥24.0bn

(FY2025: +¥7.0bn; FY2026: +¥17.0bn)

(ca.+3% vs. end-March 2025)

# Sales of Domestic Listed Equities for FY2025 Expected to be ca. ¥800bn Amid Rising Share Prices

- ▶ Following the outperformance of domestic equities, we raised our FY2025 equity sales plan to ¥700bn in November. Equity markets then rose further, lifting the fair value of our domestic equity holdings to around ¥3.5tn as of end-December, above the end-March 2025 level. FY2025 equity sales are expected to be ¥800bn.
- ▶ Reflecting the recent rally, we currently assume FY2026 equity sales to be broadly in line with FY2025.

## Trend and Outlook for DL's Domestic Listed Equity Holdings

## Outlook for Domestic Equity Sales in FY2025 <sup>(1)</sup>

**November Plan**

ca. ¥700.0bn

**Current**

Update

ca. ¥800.0bn

## Outlook for Domestic Equity Sales in FY2026 <sup>(2)</sup>

**Approximately the same level as FY2025**

(1) Economic Assumptions as of End-December 2025 (2) Outlook based on the economic environment as of end-January 2026

# Accelerating Bond Portfolio Rebalancing on Rapid Rate Hikes and Stronger-than-Expected Equity Gains / Steady Expansion of Positive Spread

- ▶ Against the backdrop of continued rises in domestic interest rates and upside in equity realization gains, we increased the planned scale of rebalancing yen-denominated bonds from the outlook as of November.
- ▶ The positive spread improvement from the portfolio rebalancing operations in response to rising interest rates is expected to be ca. ¥24.0bn annually, of which ¥17.0bn is expected to contribute from the next fiscal year.
- ▶ From FY2026 onward, we will continue rebalancing to improve yields in DL's yen bond portfolio, and we expect the positive spread to expand steadily.

## Initiatives to Expand Positive Spread

### Outlook for Domestic Bond Portfolio Rebalancing (FY2025)

#### Boost asset rebalancing with cash generated from accelerated equity sales

#### Rebalancing Target and P/L Impact

**Target:** Rebalancing of yen fixed-income assets—ca.¥1.2tn  
(vs. Nov. forecast +¥200.0bn)

**Estimated loss on sales from rebalancing:** approx. ¥350.0bn  
(vs. Nov. forecast +¥150.0bn)

#### Positive Spread Improvement

**¥24.0bn<sup>(1)</sup> per year**  
(¥17.0bn to be realized in FY2026)

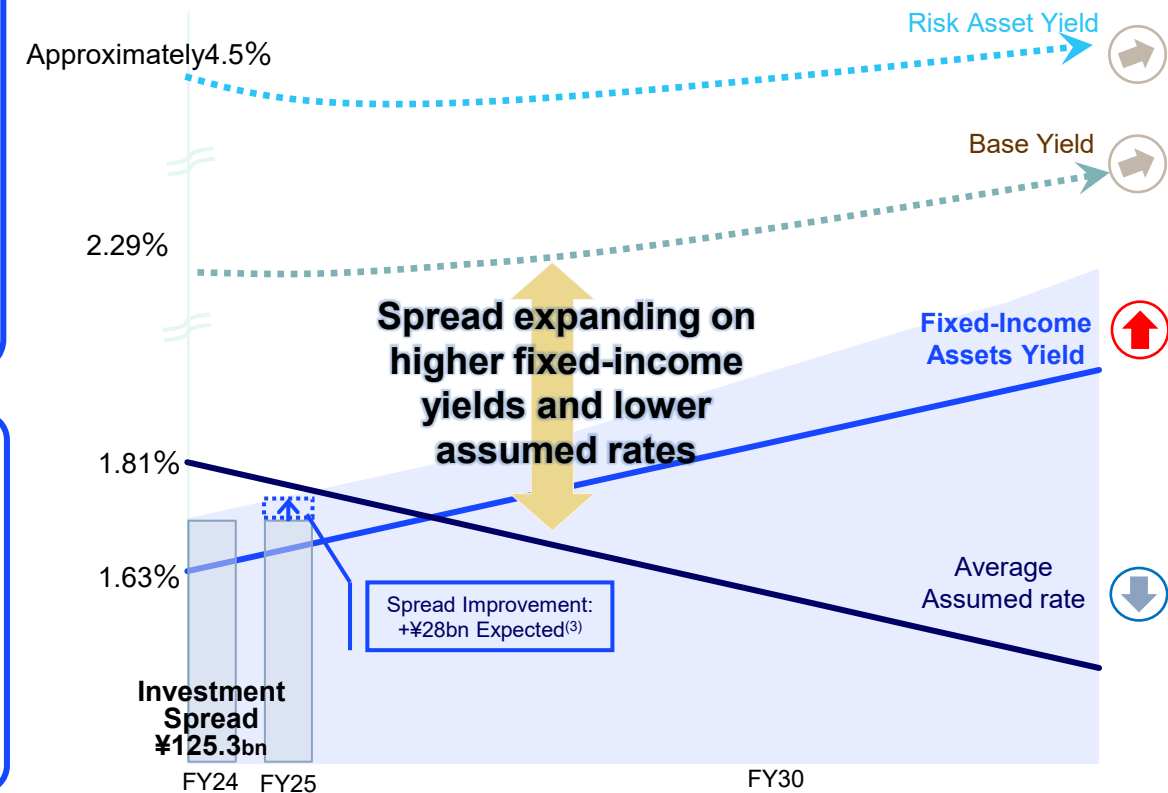

## Impairment of Policy-Reserve Matching Bonds

### No impairment of policy-reserve matching bonds is expected at this time

- ✓ As of today, we maintain sufficient buffer to the threshold, and even if the early-January rate spike were to recur, we do not expect any impairment.
- ✓ If rates rise beyond our assumptions and a bond breaches the threshold, we would consult with our auditor—taking into account our holding intent and financial outlook—and may elect not to recognize impairment.

## [Ref.][DL]Positive Spread and Yield Trends and Outlook<sup>(2)</sup>

(Future yield outlook is for illustrative purposes only.)

## Duration Matching Ratio Reduced Below 100% Level

- ▶ Given the scale of DL's balance sheet, duration matching fluctuates with yield-curve movement and time effects.
- ▶ DL holds most assets in rebalance-able policy-reserve matching bonds and adjusts the matching ratio in line with liabilities within a controllable range.
- ▶ Q3 rebalancing operations lowered the dollar duration ratio; we will keep it at or below 100% going forward.

### Asset duration measurement methodology

- ✓ As of 2Q, the dollar duration ratio calculated under the former methodology<sup>(1)</sup> was 104%. However, following the rebalancing bond portfolio, the ratio calculated under the same former methodology declined to 99% as of end of 3Q.
- ✓ With respect to the measurement of asset duration, we had previously calculated asset duration by taking a weighted average of the duration of each individual asset. As part of our efforts to control the duration ratio within 100% through more sophisticated ALM practices, we have revised the measurement methodology to align with the approach used for liability duration. Specifically, asset duration is now calculated based on a cash flow-based projection for each asset.
- ✓ From an interest rate risk management perspective, derivatives-based hedge positions and other hedges are utilized to respond to market movements.

### Duration Status (as of end-December 2025)

The duration based on the previous standard is shown on [p24](#).

(1) Economic value-based duration of insurance liabilities—mainly relating to the individual life and individual annuity segments within the general account—and yen-denominated fixed-income assets (including interest rate swaps), as well as balances of policy-reserve matching bonds and derivatives. The "Dollar Duration Ratio" is calculated for the above assets and liabilities as:  $(\text{Asset duration} \times \text{asset market value}) \div (\text{Liability duration} \times \text{liability present value})$ . (2) 87% when derivative positions are included. (Dec 2025)

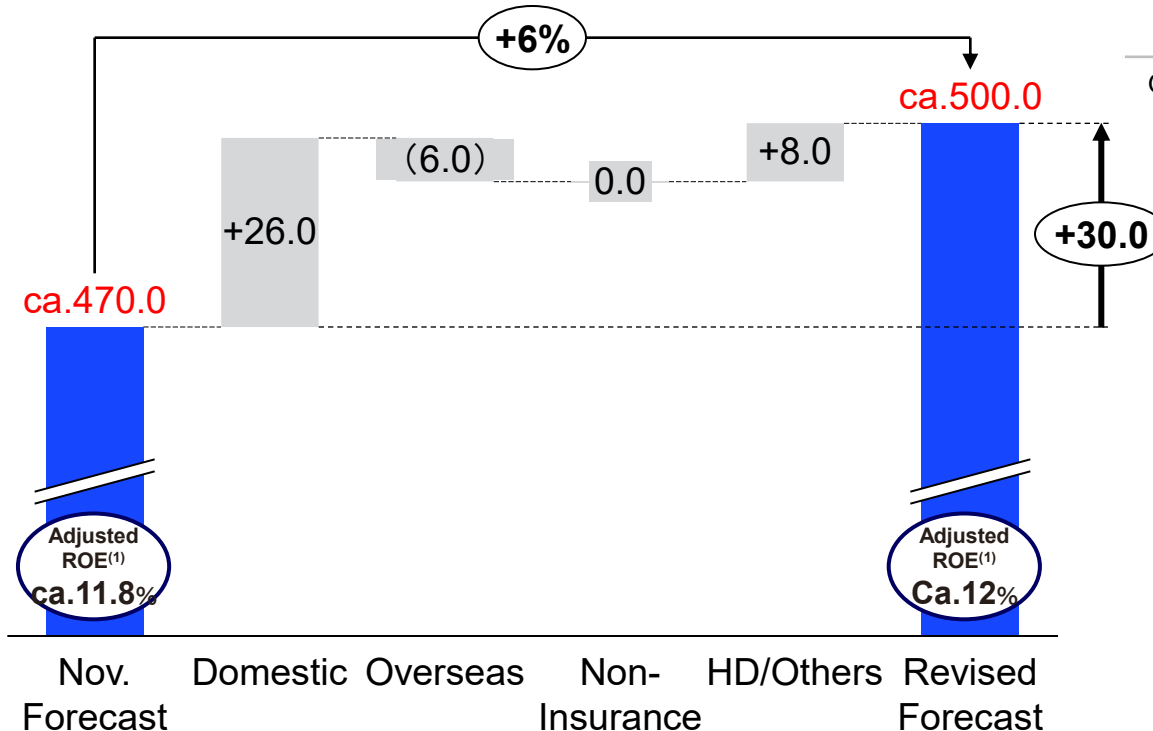

# Upward revisions of Group adjusted profit and FY2025 DPS forecasts, reflecting outperformance at DL

- ▶ Group adjusted profit for the full year is expected to be ca. ¥500.0bn, based on the economic environment as of the end of December, representing a ¥30.0bn upward revision from the November forecast, reflecting higher earnings at DL.
- ▶ Dividend per share is expected to be ¥52, up ¥1 from the November revised forecast, reflecting the upward revision of Group adjusted profit.
- ▶ We plan to raise the dividend payout ratio to 50% from FY2026.

## Value of New Business, ANP (New Business and In-force Business)

- ▶ Value of New Business (approximate figures of domestic business) increased by 27% YoY to ¥105.0bn.
- ▶ New business ANP increased by 3.1% YoY to ¥430.8bn (up 2.1% excluding forex impact). Domestically, sales of yen-denominated products increased at DFL. Overseas, new business ANP at TAL declined 21.5% YoY excluding forex impact (18.5% including forex impact) due to the absence of the large group insurance contract recorded in FY2024.

**Value of New Business

(1) Approximate figures with some simplified treatments in measurement targets and methods

## Economic Value Indicators (EV and ESR) <sup>(1)</sup>

- ▶ Group EV increased by ca.18% to around ¥9.6tn, mainly due to higher domestic equity valuations at DL.
- ▶ Group ESR increased to ca.213%, up by ca.3%pt from March 2025. While required capital increased due to factors such as a rise in mass lapse risk resulting from higher interest rates and an increase in equity risk associated with rising stock prices, the increase in eligible capital exceeded this, mainly reflecting increases in the market value of domestic equities and higher yen interest rates.

### Group EV (approximate)

End of Dec 2025      **ca. ¥9.6tn**      (vs. FY2024 year-end)

End of Dec 2025  
**ca. 213%**

(¥ in trillions)

(1) The figures are approximately.

## (Reference) Group Risk Profile (Foreign Exchange Risk)

- ▶ Within the Group risk profile, about half of FX risk stems from business investments, with the remaining half associated with DL's investments in foreign-currency-denominated risk assets (alternatives, un-hedged foreign bonds, overseas equities and real estate).
- ▶ FX risk will be appropriately controlled on a Group-wide basis, taking into account the risk increase accompanying the expansion of foreign-currency-denominated businesses, including overseas operations.
- ▶ FX sensitivity of ESR is ca. +0%, indicating that the impact of FX fluctuations on financial soundness is negligible.

Breakdown of Required Capital (Risk Amount) <sup>(1)</sup>  
(As of end-September 2025, before diversification effects)

Breakdown of Foreign Exchange Risk

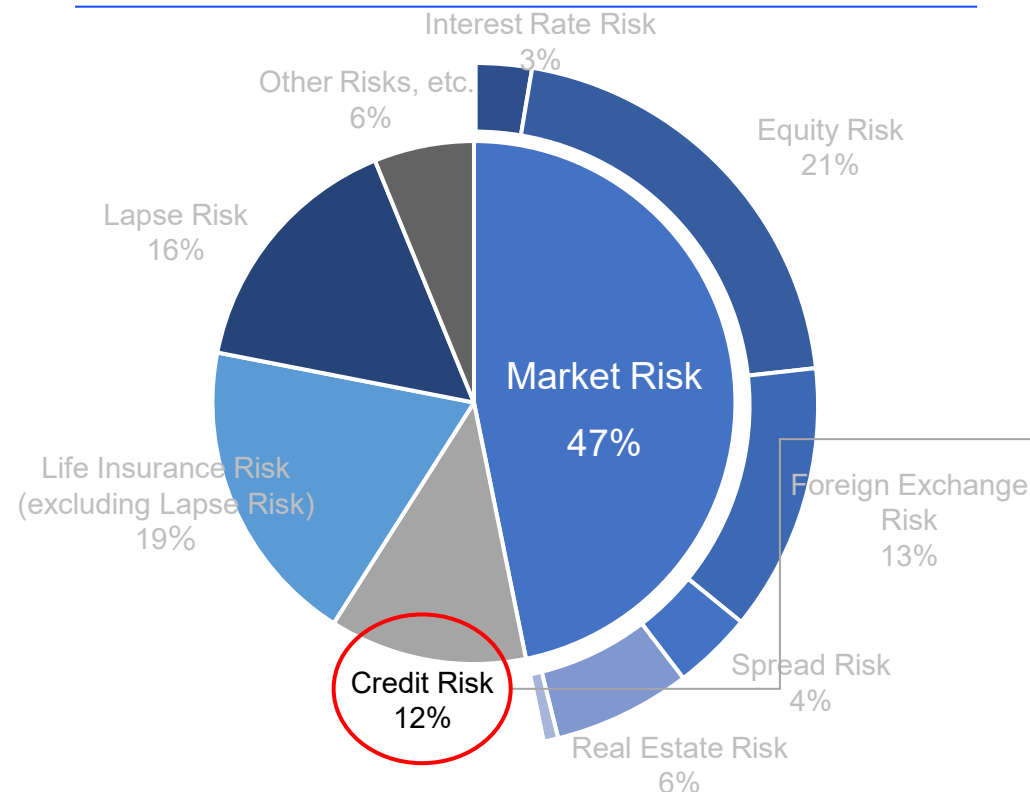

- ✓ FX risk is expected to increase as foreign currency-denominated businesses, including overseas operations, expand.
- ✓ For risk assets, investment decisions are made based on an overall risk-return assessment, taking into account risks and returns beyond FX risk

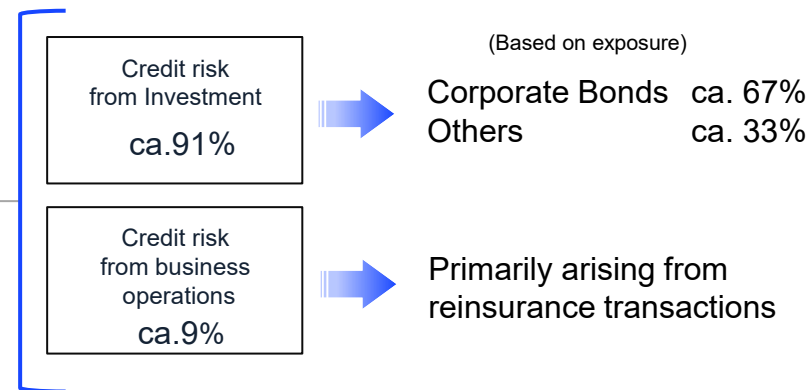

## (Reference) Group Risk Profile (Credit Risk)

- ▶ In connection with the introduction of the J-ICS regulatory framework, we revised the classification of credit risk to align with J-ICS requirements. Although credit risk is now treated outside the scope of market risk under the new regulatory framework, it continues to be managed in an integrated manner together with market risk as before, and there has been no substantive change in our overall risk management approach.
- ▶ Our credit portfolio is primarily composed of highly rated assets with prudent diversification across issuers, industries, and geographies. We conduct regular stress testing, including scenarios of credit spread widening, and continuously assess the impact on economic value and capital soundness to ensure disciplined and robust risk management.

Breakdown of Required Capital (Risk Amount) <sup>(1)</sup>  
(As of end-September 2025, before diversification effects)

Breakdown of Credit Risk

Credit Exposure by Rating <sup>(2)</sup> <sup>(3)</sup>  
(Credit Risk from Investment Portfolio)

(1) Under the J-ICS framework, regulatory risk classifications have been revised, including the reclassification of certain components previously measured under credit risk (e.g., spread risk) into market risk

(2) Based on internal ratings (3) Excluding mortgages

(2) "Net Income" represent "Net income attributable to shareholders of parent company."

(3) The full-year dividend-per-share forecast for FY2024 (ending March 2025) is stated after the stock split. The figures in the lower row represent dividends before the stock split (actuals for FY2024 and FY2025 is shown on a re-translated basis).

# Capital Reduction of Dai-ichi Frontier Life

- ▶ In light of the transition of the solvency margin regulations to an economic value-based framework, which allows for a certain release of capital based on the capital levels required under the new regulatory regime, we plan to reduce its capital and reserves, subject to approval by the relevant regulatory authorities.
- ▶ In line with the Group's capital circulation management approach, which aims to enhance the efficient utilization of capital within the Group, the surplus funds generated through this transaction will be allocated to dividends to HD and redeployed to growth businesses, thereby seeking to improve the Group's capital efficiency and corporate value. The dividend amount to HD, including proceeds from the capital reduction, will be determined after assessing DFL's capital position as of end-March under the new economic value-based regulatory regime.

## Details

(¥ in billions)	Before Reduction	Change	After Reduction	Allocation
Capital Stock	117.5	(67.5)	50.0	Other Capital Surplus
Capital Surplus	67.5	(17.5)	50.0	Other Capital Surplus
Retained Earnings Reserves	8.0	(8.0)	0.0	Retained Earnings Brought Forward

## Schedules

Date of Filing for Approval	Feb. 2026
Date of Effect	Mar. 23, 2026 (scheduled)

## Capital Circulation Management

- ✓ The Group promotes "capital circulation management," under which capital released through earned capital and risk reduction is redeployed to high-capital-efficiency and high-growth businesses while maintaining financial soundness, thereby aiming to enhance corporate value through a virtuous cycle of capital and cash generation.
- ✓ The capital generated through this initiative is expected to be used as a source of dividends to HD, in order to incorporate it into the Group's overall financial strategy.

Dai-ichi Life Holdings

Strategic utilization of capital as a source of funds for growth investments and shareholder returns

# Investment in Infomart (BtoB Platform Provider) and Collaboration through a Capital and Business Alliance Agreement

- ▶ We have decided to make an equity investment in Infomart, a listed company that provides digital services for business-to-business transactions.
- ▶ This Company holds the leading market share in a digital order and procurement platform for the food industry and is also a leading provider of invoice digitalization solutions, with ca. 1.24mn corporate users (covering ca. 97% of TSE Prime-listed companies and ca. 33.6% of domestic companies).
- ▶ Through collaboration with the Company's corporate services that help improve productivity for SMEs, we expect to expand our Group's SME customer base, including through Benefit One. In addition to the HR and labor-related services we have provided to corporate clients through Benefit One to date, adding solutions in the finance and accounting domain is expected to broaden our Group's value proposition for SMEs in the B2B services space.

## Company Overview / Financial Impact, etc.

Company Name	Infomart Corporation (TSE Prime Market: 2492)
Investment Amount / Ownership Ratio	ca. ¥17.4bn (entirely funded by HD) 15% (voting rights basis)
Expected Closing	Early March 2026 (planned) *After the investment, the company is expected to become an equity-method affiliate through the dispatch of a director (planned for March 2027).
Revenue	¥18.8bn
Net Income	¥1.9bn (both for FY2025)
Employees	716

Impact on Group ESR    Limited impact

## Main Business Segments and Characteristics

### FOOD Business – Digital Ordering Business for the Food Industry

Provides a digital order-and-procurement platform primarily for food-service businesses (restaurant chains, independent restaurants, hotels, wedding venues, etc.).

- ✓ Digitizes ordering processes between restaurants and wholesalers/manufacturers, significantly improving operational efficiency.
- ✓ Accounts for ca. 60% of revenue and contributes to stable earnings.

### ES Business – Invoice Digitalization Business

Provides an invoice digitalization platform for companies across all industries and has also begun offering industry-specific solutions.

- ✓ Digitizes the end-to-end invoice issuance and receipt process through a DtoD<sup>(1)</sup> model, significantly improving billing operations.
- ✓ Accounts for ca.40% of revenue and has achieved strong growth by capturing rising DX demand amid labor shortages.

## Strategic Rationale for the Investment

1. Strengthen our B2B service offering by leveraging the Benefit One platform.
2. Share customer bases (SMEs) and drive cross-selling through the collaboration.
3. Acquire productivity-enhancing capabilities and broaden our value proposition for corporate clients.

(1) DtoD (Data to Data), unlike AI-OCR-based digitization (Analog to Data), refers to the concept of fully digitizing transactions in an end-to-end, seamless manner.

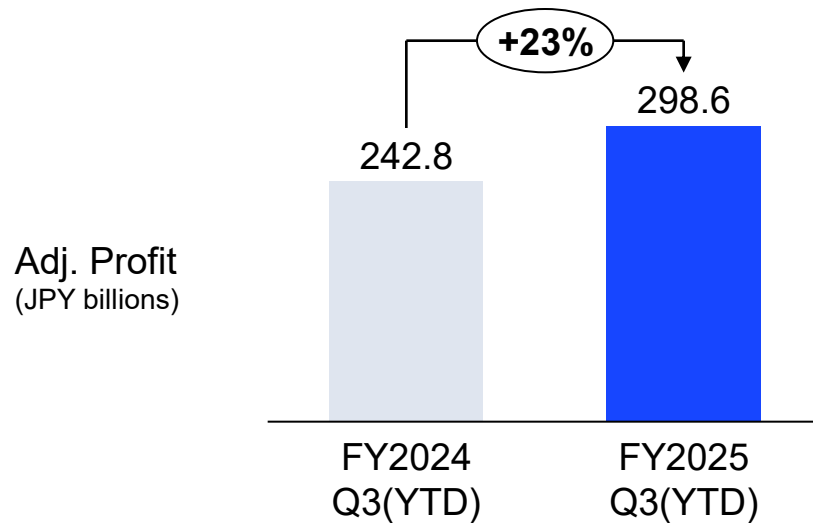

# Group Companies Performance Overview

# [Group Companies Performance Overview]

## Domestic Life Insurance Business: Dai-ichi Life

- ▶ Positive spread increased 51% YoY to ¥96.7bn, with declines in interest and dividend income from foreign bonds and investment trusts offset by higher interest and dividend income from yen bonds, foreign equities and loans, as well as lower hedging costs.
- ▶ Fundamental profit increased 3% YoY to ¥242.0bn, as the deterioration in gains from core insurance activities due to decreased margins on in-force policies was offset by an increased positive spread.
- ▶ Net profit increased 23% YoY to ¥298.6bn, driven by higher fundamental profit and increased gains on sales of securities.

(¥ in billions)	FY2024 Q3(YTD)	FY2025 Q3(YTD)	Change	(%)

(1) Estimated impact of strategic reinsurance transactions (ceding) for whole life insurance, which has been implemented since FY2018, reduces assumed interest rate burden and impacts gains from core insurance activities.

# [Group Companies Performance Overview]

## Dai-ichi Life – Factors affecting changes in fundamental profit and capital gains/losses

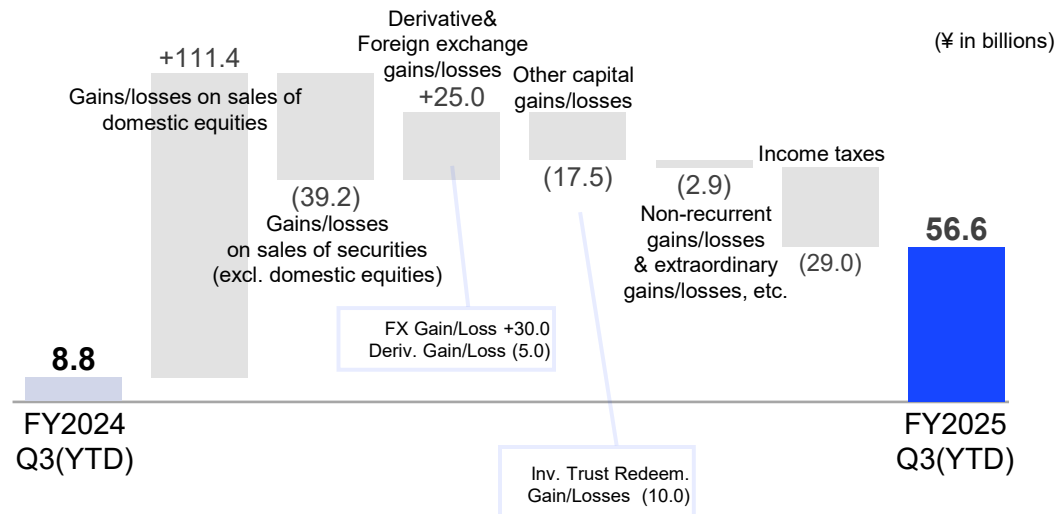

### Factors affecting changes in fundamental profit

( ): Change from the same period of the previous year

- ✓ General account investment income increased YoY, driven by strong dividend contributions from alternative assets such as private equity and hedge funds, higher interest and dividend income reflecting bond rebalancing in a rising interest rate environment, and lower hedging costs.
- ✓ Insurance-related profit declined YoY, mainly due to lower mortality and loading margins associated with a decrease in individual insurance in-force (¥(16.8)bn) and higher operating expenses.

### Factors affecting changes in capital gains/losses, etc.

(¥ in billions)	FY2024 Q3 (YTD)	FY2025 Q3(YTD)	YoY Change	Budget Variance and Key Drivers (YoY)
<b>Gains/Losses on Sales of Securities</b>	<b>183.3</b>	<b>255.6</b>	<b>+ 72.2</b>	<b>ca. (25.0)</b>
Domestic Equities	344.4	455.8	+ 111.4	(+) Higher equity prices
Yen Bonds	(192.5)	(215.1)	(22.6)	(-) Increased losses on sales due to higher interest rates
Hedged Foreign Bonds	(43.1)	(2.6)	+ 40.5	(+) Absence of losses from sales
Others	74.6	17.4	(57.1)	(-) Decreased profit from replacement of foreign equity

- ✓ Gains/losses on securities sales increased YoY, driven by a significant increase in gains on domestic equity sales reflecting higher domestic equity prices and increased sales volumes. While total gains/losses on securities sales exceeded the level of the previous year, they were below budget due to expanded rebalancing of yen-denominated bonds amid rising domestic interest rates.
- ✓ Other capital gains declined YoY, mainly due to lower gains from investment trust redemptions (¥(10.0)bn).

## New Business and Number of Sales Rep at DL

### DL New Business Performance (Sales Rep Channel)<sup>(1)</sup>

### # Sales Reps (thousand ppl)

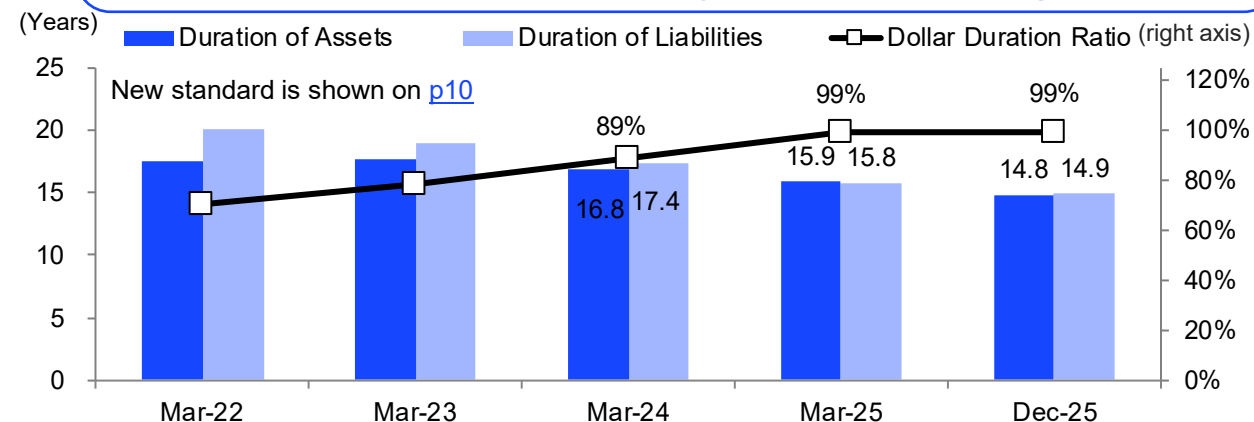

(1) Figures indexed with FY2022 Q1 as 1 (2) A proprietary indicator of revenue earned by the sales force, before deducting cost components and variable factors of the economic environment. Part of the calculation standards was changed in Q1 FY2024 (retroactively applied from Q1 FY2023). (3) Denominator is the number of sales reps excluding those in their first year after joining the company. Copyright © 2026 Dai-ichi Life Holdings, Inc.

(Disclosed in Nov.)

# [Group Companies Performance Overview]

## Domestic Life Insurance Business: Dai-ichi Frontier Life

- ▶ Net income decreased by 67% YoY to ¥9.0bn, as the positive spread expanded steadily due to growth in in-force policies, but higher new business expenses associated with increased sales of non-ceded products (yen-denominated products) led to a decrease in profit.
- ▶ Adjusted profit excluding MVA-related gains/losses decreased by 32% YoY to ¥17.9bn. Group adj. profit contribution, including profit from reinsurance blocks ceded to DLRB, was ¥28.9bn (down 29% YoY), as the contribution from DLRB increased significantly from the first half due to narrower spreads in the U.S. corporate bond market.

# [Group Companies Performance Overview] Overseas Insurance Business – Protective, USA

(Note: PLC's financial results for Q4 (October – December) of FY2025 are scheduled for release around February 26, local time.)

- ▶ Operating income increased 77% YoY to USD 547mn. While claims and other benefit payments rose in Acquisitions, this was more than offset by the positive impact of updated yield assumptions in Protection and Acquisitions, and by Retirement, which benefited from a gain on the sale of its subsidiary Concourse Securities and higher investment income.
- ▶ Net income decreased by 36% YoY to USD 196mn, mainly due to the recognition of valuation losses associated with the decline in equity markets. Adjusted profit was USD 403mn, up 68% YoY, after a USD 208mn adjustment to net income.

# Introduction of New Accounting Standard “LDTI” in PLC

- ▶ LDTI has been introduced under US GAAP, and PLC’s FY2025 results (to be released in May 2026) will be presented on an LDTI basis.
- ▶ As the initial impact in Q4 FY2025 reflects an in-year accounting change (including broader unlocking), we will exclude the impact of LDTI introduction from adjusted profit for FY2025 and incorporate it starting from FY2026.

## Overview of LDTI

- The revised standard was introduced to update the accounting treatment for long-duration insurance policies under US-GAAP, with the aim of enhancing the timeliness of liability measurement and improving the quality of disclosures
- Assumptions applied for insurance liabilities, such as mortality rates, are reviewed periodically, and—excluding fluctuations arising from discount-rate updates—the resulting impacts are recognized in P/L
- The accounting treatment of insurance contract costs such as Deferred Acquisition Cost (DAC) has been simplified

## Key changes resulting from the application

Changes		Overview of changes
A	Method for calculating insurance liabilities	<ul style="list-style-type: none"> <li>• Assumptions applied for insurance liabilities, such as mortality rates, are reviewed periodically, and—excluding fluctuations arising from discount-rate updates—the resulting impacts are recognized in P/L</li> <li>• The discount rate is updated quarterly to reflect market interest rates, which is based on Single A rated debt instrument, and the effects of such changes are recognized in Other Comprehensive Income (OCI)</li> </ul>
	Items subject to unlocking	<ul style="list-style-type: none"> <li>• The scope of unlocking is expanded to include term insurance products and others for which assumptions have been fixed since policy inception under the current accounting standard</li> </ul>
B	Introduction of market risk benefits <sup>(2)</sup>	<ul style="list-style-type: none"> <li>• The minimum death protection rider component, currently measured as part of insurance liabilities under the existing standard, will be measured at fair value</li> </ul>
C	Amortization pattern of DAC, etc.	<ul style="list-style-type: none"> <li>• Amortization method of DAC will change from a pattern based on proportional premiums or profits to a periodic amortization over the contract period</li> </ul>

## Scope of Application

Impact on 3 out of 6 PLC’s business segments

	Impact of LDTI	(Ref.) Operating profit before tax <sup>(1)</sup> (USD in millions)	
		FY2023	FY2024

## [5] Risk Assets

Breakdown of Risk Assets <sup>(1)</sup>

\*Figures in brackets are as of March 31, 2025.

Expansion of Alternative Investments<sup>(1)</sup>

(1) On a balance sheet value basis  
(2) Infrastructure investments, including real estate funds

## (Reference) Private Credit Exposure

- ▶ While our current exposure to private credit remains limited at both the Group level and within each company's portfolio, investments in alternative assets and securitized products have been increasing and are expected to continue to grow.
- ▶ At HD, we monitor credit asset exposures across Group companies. In particular, we are strengthening monitoring and early-warning capabilities for assets with high complexity and low transparency, such as fund investments and securitized products, to further enhance our risk management framework.

### Private Credit Exposure (as of Sep. 2025)

	Total Investment Assets (¥ in trillions)	Private Credit <sup>(1)</sup> (¥ in billions)	% of Total Invested Assets
<b>Group</b>	<b>58.8</b>	<b>630.0</b>	<b>1.1%</b>
DL	34.1	220.0	0.6%
DFL	9	30.0	0.3%
PLC	12.5	370.0	3.0%
DLRB	3.1	10.0	0.3%

### Group Risk Management Including Private Credit

- Monitoring with BlackRock's Aladdin system. (Implemented at HD, DL, DFL, PLC, DLRB, and TAL, covering ca. 90% of the Group's life insurance investment assets.)
- The system is used to monitor exposures to financial institutions, less-liquid credit investments, and real estate-related credit exposures, among others.

Strengthen our early-warning capabilities for credit events.  
Enhancement of the monitoring framework for underlying assets  
including look-through data.

 Aiming for utilization by the end of FY2026

## Investment Amounts by Product Fund & Foreign Currency Bond

\*Figures in brackets are as of March 31, 2025.

(1) Carrying amount - basis

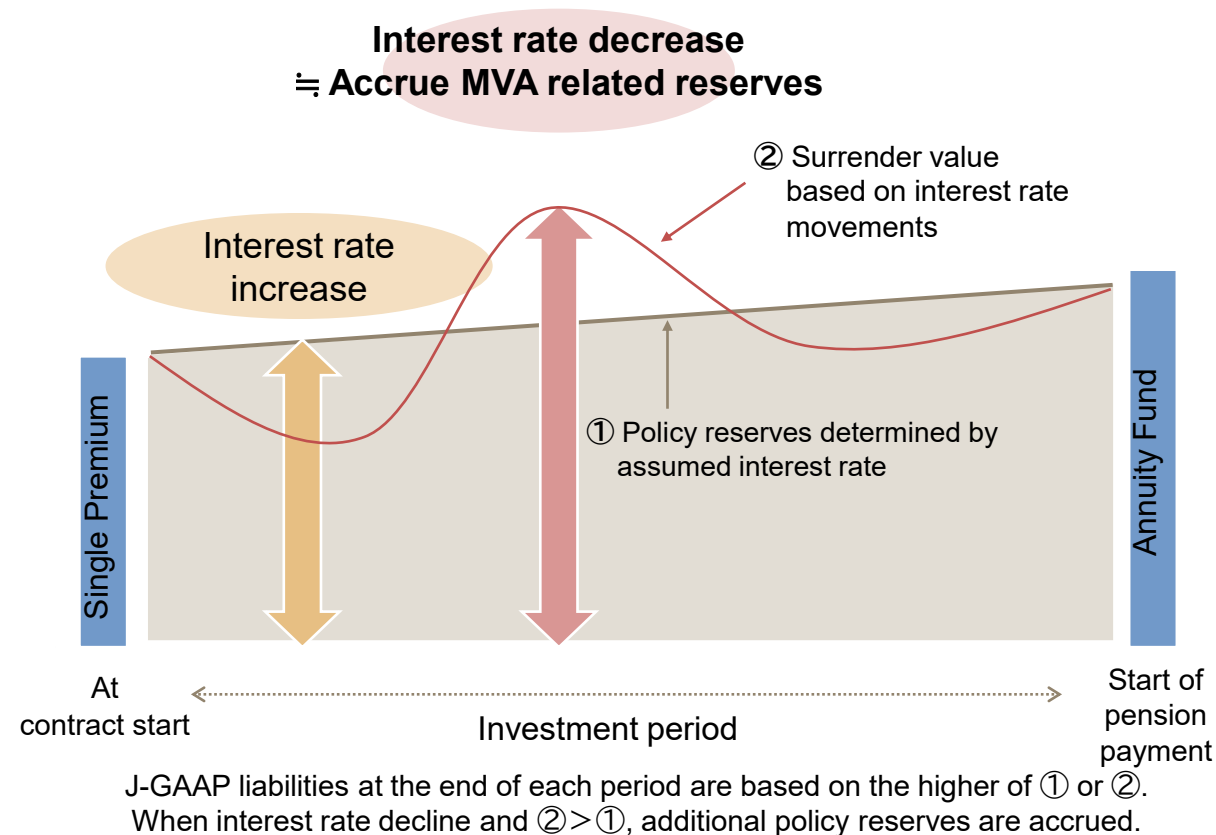

(2) Includes structured bonds backed by government bonds and corporate bonds.

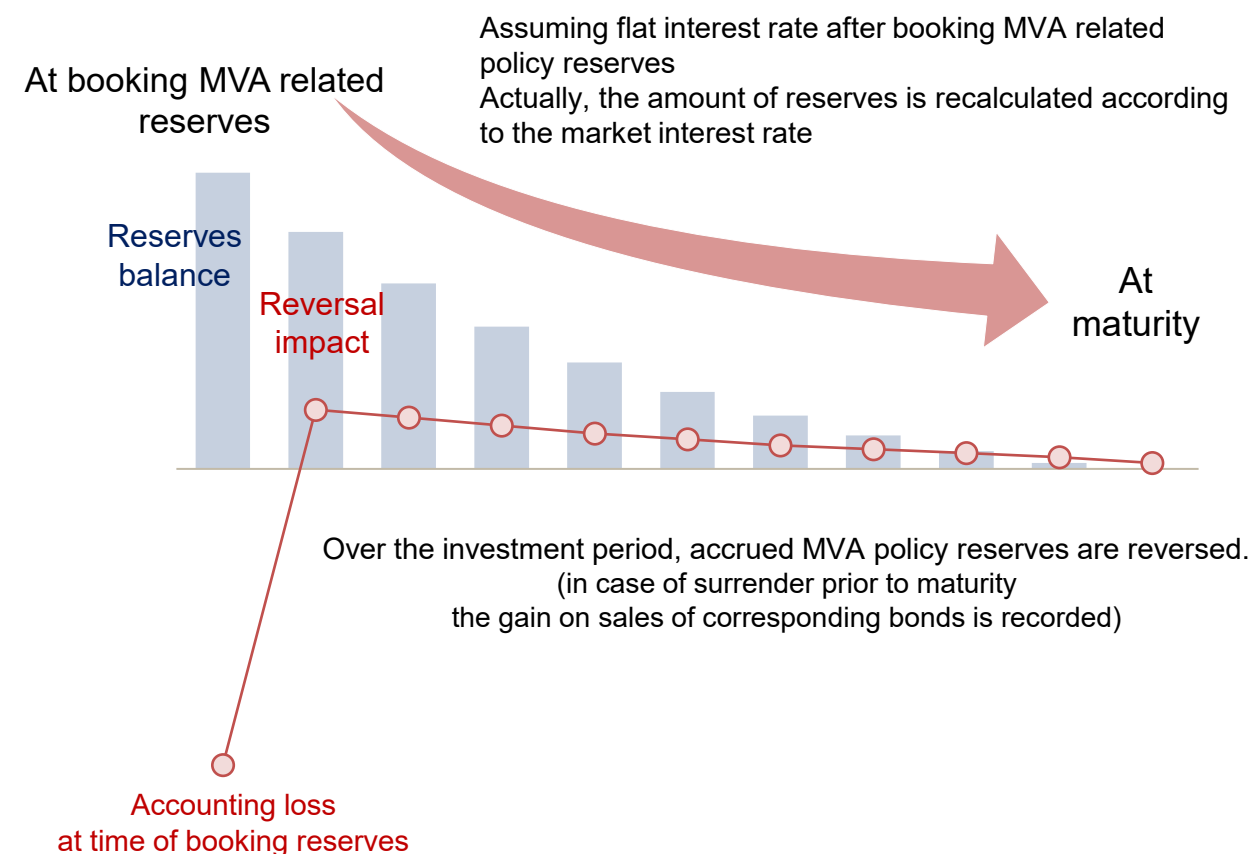

## [Reference] Gains and Losses on Market Value Adjustment (MVA)

- ▶ For products with MVA option, the J-GAAP liabilities are recognized as the greater of surrender value or the value of policy reserves determined by assumed interest rate. When interest rate decreases, the surrender value will be higher than the value of policy reserves, resulting in an accrual of MVA related policy reserves.
- ▶ Gains/losses on MVA are offset on an accounting basis over time, therefore excluded from group adjusted profit calculation.

### Policy Reserves Accrual on MVA

### Reversal of Policy Reserves Accrued on MVA

## Definition of Group Adjusted Profit

[Adjustment 1] Provision for contingency and price fluctuation reserves, etc.  
(in excess of statutory requirement, net of tax)

In addition, if there are similar provisions at overseas subsidiaries and affiliates, adjustments will be made case-by-case basis.

[Adjustment 2] MVA related gains (losses), net of tax, etc.

Adjusted for technical accounting valuation gains and losses

[Adjustment 3] Amortization of goodwill, gains/losses on acquisition phase, gains/losses on change in shareholding, etc.

Adjusted for gains/losses on organizational restructuring and amortization of goodwill, etc. in the consolidation procedures of each company.

(1) It mainly defines unrealized gains/losses on yen-denominated bonds, purchased monetary claims, hedged foreign currency-denominated bonds, and investment trusts whose main investment targets are fixed-income assets.

(2) As TAL and PNZ have adopted IFRS 17, the figures for TAL and PNZ in FY2022 are restated on IFRS 17 basis and it resulted in restating Group Adjusted ROE and related figures.

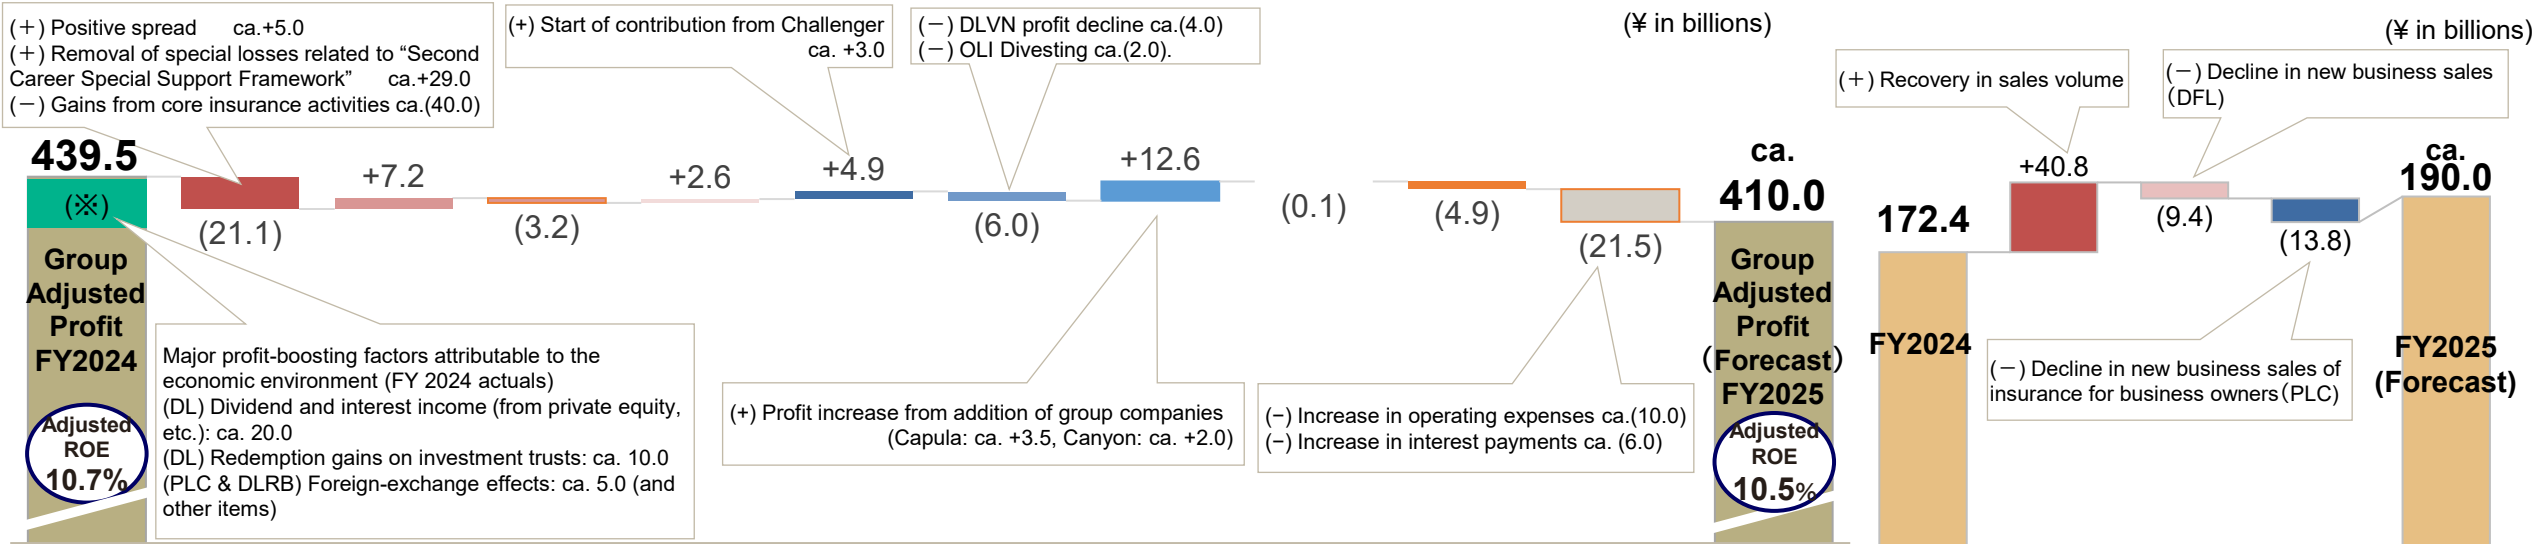

# [Reposted] FY2025 Group Adjusted Profit and Value of New Business Forecast

- DL is expected to see a decrease in profit due to the absence of favorable market conditions seen in FY2024 and a decline in gains from core insurance activities. However, this will be partially offset by steady profit growth at DFL and in Oceania. In the non-insurance segment, the asset management business is expected to deliver early profit contributions from recent strategic investments. As a result, Group adjusted profit for FY2025 is projected to exceed ¥410 billion, and adjusted ROE is expected to remain above 10%, following FY2024.
- Group value of new business is expected to increase at DL, driven by the launch of new products and higher sales volume. In contrast, DFL and PLC are expected to see a decline due to lower sales. As a result, the decrease will be offset by the recovery at DL, and Group value of new business is projected to reach ca.¥190 billion.

# [Reposted] Shareholder Payouts (Partially updated to reflect upward revision of full-year outlook for Group adjusted profit)

\*Changes in this update are shown in red

- ▶ For FY2024 shareholder returns, we have decided to pay a dividend of ¥137 <sup>(1)(2)</sup> per share (+¥4 vs. revised forecast, +¥15 vs. initial forecast), and to implement additional shareholder returns through share buybacks of up to ¥100.0bn, aiming to further enhance capital efficiency.
- ▶ DPS for FY2025 is expected to be **¥52** (**¥208** before stock split), assuming a payout ratio of 45%, supported by higher 3-year average profit and steady progress in improving capital efficiency.

## Shareholder Payouts

[Policy on cancellation of treasury stock]

The treasury stock is expected to be cancelled at an appropriate timing unless it is held for any specific reason.

### FY2024 Shareholder Payouts

Determined DPS of ¥137 (+¥24 YoY) |  
Share buybacks up to ¥100.0bn

#### Additional Payout

- Determined share buybacks up to ¥100.0bn.
- Considered HD cash, our stock price, ESR: 211% (estimated figure)

#### Dividends

- As group adjusted profit posted a record-high profit, dividend per share is ¥137 (+¥24 YoY)

### FY2025 Shareholder Payouts Forecast

FY2025  
Group Adj. Profit  
(forecast)  
ca. **¥500.0bn**

Group adjusted profit average for past 3 years is forecasted to increase, DPS is forecasted to be **¥52** (**¥208** before stock split)

#### Additional Payout

- Based on ESR level, etc. flexible additional payouts may be considered.  
(Rough guide for total payout ratio: Medium-term avg.50%)

#### Dividends

- Group adjusted profit average for the past 3 years, including FY2025 forecast, is expected to increase. DPS is forecasted to be **¥52** (**+¥18** vs. FY2024), based on a payout ratio of 45%.  
**\*¥208** before stock split (**+¥71** YoY)

# [Reposted] Shareholder Payout Policy (Partially updated to reflect upward revision of full-year outlook for Group adjusted profit)

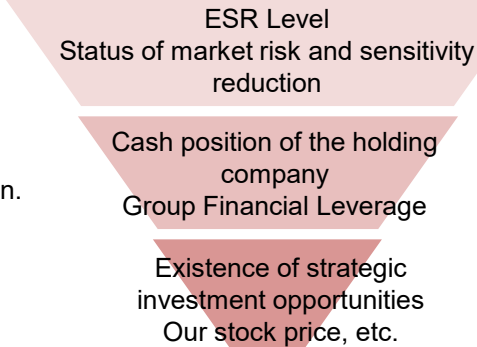

\*Changes in this update are indicated in red and underlined

## Shareholder Payout Policy

Consider flexible additional payouts (from FY2020)

- Rough guide for Total Payout Ratio considered: Mid-term avg.50%

Considerations for additional payout

[Policy on cancellation of treasury stock]  
The treasury stock is expected to be cancelled at an appropriate timing unless it is held for any specific reason.

Image on transition of total payout ratio

The scale and timing of additional payout is decided strategically

[Image on transition of dividend payout ratio]

Stable dividend based on profit (from FY2025)

[Dividend payout ratio] **45%+ each FY**  
(Currently considering increasing the interim dividend payout ratio to 50% from the FY2026 interim dividend)  
Average group adjusted profit for past 3 years  
Basically no reduction of dividend per share.
