1. Business Highlights

(1) Policies in Force and New Policies

Policies in Force

		As of March 31, 2013				As of March 31, 2014			
	Number of policies		Amount		Number of policies		Amount		
	(thousands)	% of March 31, 2012 total	(millions of yen)	% of March 31, 2012 total	(thousands)	% of March 31, 2013 total	(millions of yen)	% of March 31, 2013 total	
Individual insurance	15	3,310.7	133,326	4,104.1	98	651.4	768,813	576.6	
Individual annuities	368	116.3	2,103,035	120.0	441	119.7	2,545,193	121.0	
Group insurance	-	-	-	-	-	-	-	-	
Group annuities	-	-	-	-	-	-	-	-	

Note: Policy amount in force for individual annuities is equal to the sum of (a) the amount required to fund annuity payments when they commence for annuities that have not yet commenced paying out and (b) policy reserves for annuities that have commenced paying out.

New Policies

	Number o	of policies				
	(thousands)	% of March 31, 2013 total	(millions of yen)	% of March 31, 2013 total	New Business	Net increase from conversions
Year ended March 31, 20	014					
Individual insurance	84	569.2	640,452	524.8	640,452	-
Individual annuities	99	130.2	567,742	145.6	567,742	-
Group insurance	-	-	-	-	-	-
Group annuities	-	-	-	-	-	-
Year ended March 31, 20)13					
Individual insurance	14		122,028		122,028	-
Individual annuities	76		389,862		389,862	-
Group insurance	_		-		_	-
Group annuities	-		-		-	-

Note: Amount of new policies (new business) for individual annuities is equal to the amount required to fund annuity payments when they commence.

(2) Annualized Net Premiums

Policies in Force

(millions of yen except percentages)

		As of March 31, 2013	% of March 31, 2012 total	As of March 31, 2014	% of March 31, 2013 total
Indi	vidual insurance	9,298	3,555.3	57,984	623.6
Indi	vidual annuities	228,272	119.5	270,574	118.5
Tota	al	237,571	124.2	328,558	138.3
	Medical and survival benefits	-	-	-	-

New Policies

(millions of yen except percentages)

	Year Ended March 31, 2013	% of March 31, 2012 total	Year Ended March 31, 2014	% of March 31, 2013 total
Individual insurance	8,512	4,361.4	49,190	577.8
Individual annuities	52,208	111.1	62,117	119.0
Total	60,720	128.7	111,307	183.3
Medical and survival benefits	-	-	-	-

Note: Annualized net premiums are calculated by multiplying the per-premium payments by a multiplier that depends on the premium payment terms. For single-premium contracts, the amount is calculated by dividing the premium by the duration of the policy.

(3) Profit and Loss Items

(millions of yen except percentages)

	Year Ended March 31, 2013	% of March 31, 2012 total	Year Ended March 31, 2014	% of March 31, 2013 total

Note: Survival benefit amounts for individual annuities are the sum of (a) the amount required to fund annuity payments when they commence for annuities that have not yet commenced paying out and (b) policy reserves for annuities that have commenced paying out.

3. Investment of General Account Assets

(1) Overview of Investment of General Account Assets for the Fiscal Year ended March 31, 2014

A. Investment Environment

The Japanese economy achieved high growth above potential growth rate during the fiscal year ended March 31, 2014 due to a) acceleration of public expenditures as a part of the Japanese government's economic policy and b) a rush demand in individual consumption before the planned increase in consumption tax.

The U.S. economy maintained steady recovery mainly led by the individual consumption backed by improved employment and income situations, despite the downward pressure on the economy due to budget cuts of the government associated with budget sequestration. The European economy continued its recovery, owing to the enhanced monetary easing measures by the European Central Bank (ECB) and the fiscal reconstruction of Euro-zone countries.

Given the economic environment described above, the investment environment was as follows:

[Domestic interest rates]

Domestic bond markets were volatile as the yield on ten-year Japanese government bonds (JGBs) temporarily declined to 0.315%, a historically low level among global economies, given the 'quantitative and qualitative monetary easing measures' by the Bank of Japan (BOJ). However, it showed a moderate downward trend by the end of the fiscal year as the effect of the BOJ's purchase of JGBs gradually materialized.

(Yield on ten-year government bonds: April 1, 2013: 0.560%; March 31, 2014: 0.640%

[Domestic Stocks]

The Nikkei 225 temporarily rose to the 16,000 level by the end of 2013, the highest level since November 2007, due to expectations for overcoming deflation given a) aggressive monetary easing measures by the BOJ, b) the growth strategies of the Japanese govenment and c) an improvement in corporate earnings associated with the depreciation of the yen. After that, the Nikkei 225 declined to the 14,000 level because of growing concern over a potential slowdown in the emerging market economies related to the tapering of quantitative easing in the U.S..

(Nikkei 225 Stock Average: April 1, 2013 : 12,397; March 31, 2014 : 14,827)

(TOPIX: April 1, 2013: 1,034; March 31, 2014: 1,202)

[Foreign Currency]

As the yen temporarily appreciated against the U.S. dollar to the $\frac{1}{2}$ 93 level due to a) the turmoil in the market related to the initiation of tapering of quantitative easing in the U.S. by the Federal Reserve Board (FRB), the market went to a volatile period during the first half of the fiscal year. Then, due to a) the yen depreciation pressure associated with the monetary easing measures by the BOJ and current account deficit in Japan and b) the increased dollar appreciation pressure as the FRB decided the tapering of the quantitative easing in December 2013, the yen depreciated against the dollar to the $\frac{1}{2}$ 105 level for the first time since October 2008. By the end of the fiscal year, growing concern over the emerging economies and geopolitical risks led to the volatile market again.

The yen depreciation against the euro progressed given the euro appreciating factors such as Euro-zone countries' economic recovery current account surplus.

(yen /U.S. dollar: April 1, 2013 : ¥94.05 ; March 31, 2014 : ¥102.92) (yen/euro: April 1, 2013 : ¥120.73 ; March 31, 2014 : ¥141.65)

B. Investment Policies

In view of the liability characteristics of life insurance policies, assets in the general account are invested in accordance with asset-liability management (ALM) principles with the primary objective of steadily paying annuities, insurance proceeds, and benefits over the long term.

General account assets are invested primarily in yen-denominated bonds, and call loans, other money market instruments. Foreign-currency denominated insuarance are invested in foreign-currency denominated bonds.

Certain instruments are also used to mitigate the guaranteed minimum benefit risk on individual variable annuities.

C. Investment Results

The Company invested primarily in fixed-income assets, such as yen-denominated bonds, and call loans, other money market instruments. Foreign-currency denominated insuarance are invested in foreign-currency denominated bonds. Derivative trades attributable to money held in trust and investments in foreign securities (investment trusts) were also used to mitigate the guaranteed minimum benefit risk on individual variable annuities.

As a result, investment income was 38,447 million yen mainly due to interest and dividends (23,511 million yen), gains on sales of securities (8,034 million yen), and foreign exchange gains (6,610 million yen). Investment expenses were 35,846 million yen mainly due to losses on money held in trust (19,178 million yen), incurred through transactions to hedge the guaranteed minimum benefit risk on individual variable annuities, derivative transaction losses (11,947 million yen) and losses on investment in trading securities (3,879 million yen).

(2) Asset Composition

Notes to the Non-Consolidated Balance Sheet as of March 31,2014

- 1 Securities (including monetary claims bought which is equivalent to marketable securities) are valued as follows:
 - (a) Trading securities are valued at fair value (sales cost is calculated with the moving-average method).
 - (b) Policy-reserve-matching bonds (bonds defined by the Japanese Institute of Certified Public Accountants (JICPA) Industry Audit Committee Report No. 21 entitled Treatment of Accounting and Auditing Concerning Policy-reserve-matching Bonds in the Insurance Industry) are valued using the moving-average amortized cost (straight line) method.
 - (c) Other securities with fair values are valued at fair value using market prices as of the end of the year (sales cost is calculated with the moving-average method). Securities for which it is not practicable to determine fair value are recorded on the balance sheet at acquisition cost.
 - Valuation differences on other securities are reported as a component of net assets.
- 2 Risk management policies regarding policy-reserve matching bonds are as follows:
 - The Company categorizes its insurance products into sub-groups by the attributes of each product and, in order to manage risks properly, formulates its policy on investments and resource allocation based on the balance of the sub-groups. Moreover, the Company periodically checks that the duration gap between policy-reserve-matching bonds and policy reserves stays within a certain range. The sub-groups are:
 - (a) Individual insurance and annuities (JP yen-denominated, short term)
 - (b) Individual insurance and annuities (JP yen-denominated, long term)
 - (c) Individual insurance and annuities (US dollar-denominated)
 - (d) Individual insurance and annuities (AUS dollar-denominated)
 - with the exception of certain types and policies.

(Additional Information)

Effective the fiscal year ended March 31, 2014, the Company added individual insurance and annuities (JP yen-denominated, long term) as a new sub-group in order to conduct appropriate duration control, taking into account debt situation, and thus promote more sophisticated ALM. This addition did not have any impact on profits or losses of the Company for the fiscal year ended March 31, 2014.

- 3 Derivative transactions (including those attributable to money held in trust and foreign securities (investment trusts)) are reported at fair value
- 4 Tangible fixed assets are depreciated with the declining-balance method.

 Other tangible fixed assets that were acquired for 100,000 yen or more but less than 200,000 yen are depreciated in equal increments over three years.
- 5 Intangible fixed assets are depreciated with the straight-line method.
- 6 Foreign currency-denominated assets and liabilities are translated into yen-denominated amounts at market exchange rates as of the book closing date.
 - Changes in market values of bonds included in foreign currency-denominated other securities are divided into two, and the portion attributable to changes in the securities' nominal market prices in their local currencies is included in "valuation difference" on other securities, and the rest in "foreign exchange gains/losses".
- 7 Reserve for possible loan losses is calculated by multiplying the value of loan claims by the historical loan loss rates calculated from actual loan losses, pursuant rules on the self-assessment of assets as well as rules on the write-offs on and provisioning of reserves for assets. Relevant departments assess all loan claims based on the self-assessment rules, and an independent department responsible for auditing assets audits the assessment results. Provisions to the reserve for possible loan losses are determined based on the assessment results.
- 8 Reserve for employees' retirement benefits is provided based on the projected benefit obligations as of fiscal year-ended March 31, 2014.
 - The amount is calculated using the simplified method which assumes the Company's benefit obligation to be equal to the benefits payable assuming the voluntary retirement of all employees at fiscal year-end.
- 9 To provide for the retirement benefits of directors, executives and auditors seconded from the Dai-ichi Life Insurance Company (the parent company), which are payable to the parent company, the Company calculates its share of the relevant accrued benefits as of fiscal year-end pursuant to the parent company's regulations on retirement benefits. The amount is recorded in the reserve for retirement benefits of directors, executive officers and corporate auditors.

- 10 The reserve for price fluctuations is calculated pursuant to Article 115 of the Insurance Business Act.
- 11 Finance leases that do not transfer title to the leased assets to the lessee are treated as follows, pursuant to the Accounting Standard for Lease Transactions (Accounting Standards Board of Japan (ASBJ) Statement No. 13) and its associated Guidance on the Accounting Standard for Lease Transactions (ASBJ Guidance No. 16).
 - (a) Lease agreements concluded on or after April 1, 2008, except those of minor value, are accounted for as ordinary sales/purchase transactions.
 - (b) Transactions other than those corresponding to (a) above are accounted for as ordinary lease transactions.
- 12 National and local consumption taxes are recorded with the tax-exclusion method. Non-recoverable consumption tax on certain assets is capitalized as a prepaid expense and amortized equally over five years in accord with corporate taxation law, and such taxes other than deferred consumption tax are recognized as an expense in the year in which they are incurred.
- 13 Policy reserves are those reserves set aside in accord with Article 116 of the Insurance Business Act. Insurance premium reserve is calculated as follows:
 - (a) For policies subject to the Standard Policy Reserve Method: Method stipulated by the Financial Services Agency Commissioner (Ministry of Finance Notification No. 48, 1996)
 - (b) For policies not subject to the Standard Policy Reserve Method: Net level premium reserve method
- 14 In view of the liability characteristics of life insurance policies, assets in the general account (i.e., not in separate accounts as defined by Article 118, paragraph 1, of the Insurance Business Act) are invested primarily in fixed-income assets (government and corporate bonds) in accordance with asset-liability management (ALM) principles with the primary objective of steadily paying annuities, insurance proceeds, and benefits over the long term.
 - To mitigate the guaranteed minimum benefit risk on individual variable annuities, the Company engages in derivative transactions (foreign exchange forward contracts, currency futures contracts, stock-index futures contracts, securities futures contracts).

The Company's holdings of financial instruments, mainly securities and derivatives, are subject to market risk and credit risk.

Market risk management. Under its internal investment policy and market risk management rules, the Company manages market risk by making medium- to long-term investments in a manner appropriate to its liabilities, constantly confirming the consistency of its portfolio positions and investment policies and measuring value-at-risk (VaR).

Credit risk management. Under its internal investment policy and credit risk management rules, the Company manages credit risk by establishing credit limits designed to avoid excessive concentration of risk toward a specific company or group. Each individual transaction is screened before credit is extended and follow-up checks are conducted regularly. In addition, the Company measures value-at-risk (VaR) as part of its effort to better grasp and analyze credit risk exposure.

Derivative transactions used by the Company to mitigate the guaranteed minimum benefit risk on individual variable annuities are conducted in accordance with the Company's policy and internal rules on managing guaranteed minimum benefit risk. In addition to verifying the effectiveness of hedge positions and managing gains and losses generated by derivative transactions on a daily basis, the Company regularly monitors reductions in guaranteed minimum benefit risk and gauges its value-at-risk (VaR).

The Compliance Control and Risk Management Department reports regularly to the Board of Directors on the status of the Company's entire risk position, including guaranteed minimum benefit risk.

Amounts of financial instruments recorded on the balance sheet, their fair values, and differences between the two are as follows:

(millions of yen)

	Carrying amount on balance sheet	Fair value	Difference
(1) Cash and deposits	49,790	49,790	-
(2) Call loans	28,300	28,300	-
(3) Monetary claims bought	6,040	6,040	-
(4) Money held in trust	31,701	31,701	-
(5) Securities	3,220,656	3,226,628	5,972
(a) Trading securities	1,799,264	1,799,264	-
(b) Policy-reserve-matching bonds	734,108	740,080	5,972
(c) Other securities	687,283	687,283	-
Assets total	3,336,488	3,342,461	5,972
Derivative transactions			
(a) Derivative transactions to which hedge accounting is not applied	(372)	(372)	-
Derivative transactions total	(372)	(372)	-

Note: Derivative transactions include those attributable to money held in trust and foreign securities (investment trusts).

Net derivative assets and liabilities arising from derivative transactions are reported as a net value. A negative total indicates a net liability.

Fair values of financial instruments are calculated as follows:

(a) Cash and deposits

Deposits are recorded at book value as all deposits have no maturities and their book values approximate their fair values.

(b) Call loans

Since all call loans are close to due date and their fair value is close to carrying amounts, fair value of call loans is based on their carrying amount.

(c) Monetary claims bought

Fair value of monetary claims bought is based on the reasonably calculated price.

(d) Money held in trust

Information on the fair value of derivative transactions attributable to money held in trust appears below in "(f) Derivative transactions".

(e) Securities

Fair value of bonds is based on the price on stock exchanges. Fair value of mutual funds is based on unit price.

(f) Derivative transactions

For foreign exchange forward contracts, futures market prices on the book closing date are used as fair value. For currency swap contracts, the amounts discounted to present value are used as fair value. For total return swap contracts, the amounts calculated by using indices on the book closing date are used as fair value. For futures transactions and other market traded instruments, securities exchange market closing prices are used as fair value.

- 15 Accumulated depreciation on tangible fixed assets is 131 million yen.
- 16 Securities lent under lending agreements are included in the balance sheets. The total balance of securities lent as of March 31, 2014 was 10,341 million yen.
- 17 Assets in separate accounts, as defined by Article 118 of the Insurance Business Act, total 1,808,811 million yen. Liabilities in separate accounts total the same amount.
- 18 Financial liabilities to affiliated companies total 23 million yen.
- 19 Deferred tax asset accruals are primarily attributable to policy and other reserves of 33,028 million yen and retained losses brought forward of 8,993 million yen. Deferred tax liability accruals are mainly attributable to net unrealized gains on securities of 3,538 million yen. Valuation allowance of 44,852 million yen were deducted from deferred tax assets.
- 20 The effective statutory tax rate for the fiscal year ended March 31, 2014, was 33.32%, and the Company's corporate income tax burden (corporate income tax as a percentage of pretax income) was -0.39%. The difference was due mainly to the impact of allowance (-33.90%).

- 21 The value of assets (marketable securities) pledged as collateral is 4,611 million yen.
- Assets for which rights held can be freely disposed of by means of sale or collateralization are available-for-sale securities that have been accepted as collateral of reinsurance dealings and derivative transactions, and in this year-end ownership was maintained for total market value of 8,015 million yen as of March 31, 2014, and the Company have no assets pledged as a re-collateral.
- 23 Reserves for outstanding claims attributable to the portion of reinsurance specified in Article 71, paragraph 1, of the Ordinance for Enforcement of the Insurance Business Act, applied under Article 73, paragraph 3, of said Ordinance ("reserves for outstanding ceding insurance claims"), amount to 1 million yen. Policy reserves attributable to the portion of reinsurance specified in Article 71, paragraph 1, of said Ordinance ("ceding reinsurance policy reserves") amount to 12,262 million yen.
- 24 As of fiscal year-end, the Company estimated that it would be required to contribute 2,136 million yen to the Life Insurance Policyholders Protection Corporation of Japan pursuant to Article 259 of the Insurance Business Act. Contributions are expensed as an operating expense in the fiscal year in which they are incurred.
- 25 Net assets per share is 26,123,971.33 yen.

8. Disclosed Claims Based on Categories of Obligors

(millions of yen)

	As of March 31, 2013	As of March 31, 2014
Claims against bankrupt and quasi-bankrupt obligors	ı	-
Claims with collection risk	ı	-
Claims for special attention	ı	-
Subtotal (I)	-	-
[Percentage (I)/(II)]	[-]	[-]
Claims against normal obligors	10,456	10,347
Total (II)	10,456	10,347

- Note: 1. Claims against bankrupt and quasi-bankrupt obligors are loans to borrowers who are subject to bankruptcy, corporate reorganization or rehabilitation or other similar proceedings and other borrowers in serious financial difficulties.
 - Claims with collection risk are loans to obligors (other than bankrupt and quasi-bankrupt obligors) with deteriorated financial condition and results of operations from which it is unlikely that the principal and interest on the loans will be recovered.
 - 3. Claims for special attention are loans on which principal and/or interest are past due for three months or more and loans with a concessionary interest rate, as well as loans with renegotiated conditions in favor of the borrower, including renegotiated schedule and/or waivers, in each case, other than the loans described in note 1. or 2. above.
 - 4. Claims against normal obligors are all other loans.

9. Risk-Monitored Loans

Not applicable.

10. Solvency Margin Ratio

(millions of yen)

	As of March 31, 2013	As of March 31, 2014
Total solvency margin (A)	219,637	229,705
Common stock, etc.	57,269	40,367
Reserve for price fluctuations	775	1,714
Contingency reserve	92,403	107,274
General reserve for possible loan losses	1	8
Net unrealized gains on securities (before tax) × 90% *	9,420	10,350
Net unrealized gains (losses) on real estate × 85% *	-	-
Policy reserves in excess of surrender values	59,768	69,990
Qualifying subordinated debt	-	-
Excluded portion of policy reserves in excess of surrender values and qualifying subordinated debt	-	-
Excluded items	-	-
Other	-	-
Total Risk $\sqrt{(R_1 + R_8)^2 + (R_2 + R_3 + R_7)^2} + R_4$ (B)	46,798	68,429
Insurance risk R ₁	5	34
3rd sector insurance risk R ₈	-	-
Assumed investment yield risk R_2	4,330	12,939
Guaranteed minimum benefit risk R ₇	22,493	22,812
Investment risk R ₃	18,611	30,683
Business risk R ₄	1,363	1,994
Solvency margin ratio $\frac{(A)}{(1/2) \times (B)} \times 100$	938.6%	671.3%

^{*:} Multiplied by 100% if losses.

Note: 1. The above figures are calculated based on Articles 86 and 87 of the Enforcement Regulations of Insurance Business Act, and Announcement No.50, Ministry of Finance, 1996.

2. Guaranteed minimum benefit risk is calculated by the standard method.

11. Status of Separate Account for the Fiscal Year Ended March 31, 2014

Losses on redemption of securities	-	-
Losses on valuation of securities	-	-
Foreign exchange losses	-	-
Derivative transaction losses	-	-
Other investment losses	7	26
Net investment income	168,524	113,068

12. Consolidated Financial Summary

Not applicable.

Reference: Exposure to Securitized Products Including Subprime-Related Investment

The Company discloses its exposure to securitized products and subprime-related investments, based on the "Leading-Practice Disclosures for Selected Exposures" included in the Financial Stability Forum (FSF) report announced in April 2008.

The Company's exposure to securitized and subprime-related products is as follows:

The Company held no direct investments in subprime-related products as of March 31, 2014.

The Company defines "unrealized gains (losses)" as fair value less book value and "realized gains (losses)" as total of gains (losses) on sales and impairment losses.

The Company's exposure to securitized products

1. Special-Purpose Entities (SPEs, as of March 31, 2014)

The Company holds no investments in SPEs.

2. Collateralized Debt Obligation (CDOs, as of March 31, 2014)

The Company holds no investments in CDOs.

3. Other Subprime/Alt-A Exposure (as of March 31, 2014)

The Company holds no securitized products backed by subprime/Alt-A exposure.

4. Commercial Mortgage-Backed Securities (CMBS, as of March 31, 2014)

The Company holds no commercial mortgage-backed securities.

5. Leveraged Finance (as of March 31, 2014)

The Company holds no leveraged finance products.

6. Others (as of March 31, 2014)
